

PRAYER FOR RAIN

I pray for an overflow
that will take away the
heat and cool the
parched earth. I pray
for rains to fall and grow
food for people and
their livestock. Lord, we
ask all these in Jesus'
Name, Amen.

Spontaneous Evolution Bruce H. Lipton, PHD, Steve Bhaerman, 2010-08-01 We've all heard stories of people who've experienced seemingly miraculous recoveries from illness but can the same thing happen for our world According to pioneering biologist Bruce H Lipton it's not only possible it's already occurring In *Spontaneous Evolution* this world renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how each of us can participate in this global shift In collaboration with political philosopher Steve Bhaerman Dr Lipton invites readers to reconsider the unquestionable pillars of biology including random evolution survival of the fittest and the role of DNA the relationship between mind and matter how our beliefs about nature and human nature shape our politics culture and individual lives and how each of us can become planetary stem cells supporting the health and growth of our world By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo we can trigger the spontaneous evolution of our species that will usher in a

brighter future **Praying for Rain** José-Antonio Espín-Sánchez, 2023 We study the climate as a determinant of religious belief People believe in the divine when religious authorities the church can credibly intervene in nature on their behalf We present a model in which nature sets the pattern of rainfall over time and the church chooses when optimally to pray in order to persuade people that it has caused the rain We present evidence from prayers for rain in Murcia Spain that the church follows such an optimal policy and that its prayers therefore predict rainfall In our model praying for rain can only persuade people to believe if the hazard of rainfall during a dry spell is increasing over time so that the probability of rainfall is highest when people most want rain We test this prediction in an original data set of whether ethnic groups around the world traditionally prayed for rain We find that prayer for rain is more likely among ethnic groups dependent on intensive agriculture for subsistence and that ethnic groups facing an increasing rainfall hazard are 53% more likely to pray for rain consistent with our model We interpret these findings as evidence for the instrumentality of religious belief
