The Problem of Formulating Design Problems Juan Felipe Ruiz Muñoz,2020-11-23

It is common for a design team to be handed a problem to solve for others The handing over is normally referred to as a briefing process and the documentation of the starting point and what is to be done is known as a brief It is known that the way we frame and understand a problem influences what paths we see to potential solutions The aim of this thesis is to understand what makes a good design brief and to do so in order to create an empirically informed and theoretically underpinned typology of design briefs and the kind of search processes they are disposed to induce Different bodies of literature have tried to grasp how design solves problems in order to understand designer s behavior and ultimately facilitate or improve it Distinctions can and have been made between different kinds of problem formulations as well as different problem solving approaches This thesis aims to integrate two previously distinct literatures search process from the organizational perspective developed by James G March Herbert A Simon Richard Cyert and others and Design and the Design Process from the perspectives of authors such as Donald Schön Kees Dorst and Nigel Cross among others to propose a typology of design briefs in order to ultimately facilitate problem formulation and subsequently facilitate the design process The simple and immediate answer to the question of what makes a good design brief is that depends It depends on the design process to be followed if there is one it depends on the kind of goals that should be achieved the time available and it also depends on how much and what is known about the problem and potential solutions Based on this four ideal types of design briefs are articulated including the expected associated search behavior and challenges of design teams Det r vanligt att ett designteam f r ett problem att l sa t andra verl mnandet kallas normalt en briefing process och dokumentationen av utg ngspunkten och vad som ska g ras kallas ett design brief Det r k nt att det s tt vi ramar in och f rst r ett problem p verkar vilka v gar vi ser till potentiella l sningar Syftet med denna avhandling r att f rst vad som g r ett bra design brief och att g ra det f r att skapa en empiriskt informerad och teoretiskt underbyggd typologi av design brief och vilken typ av s kprocesser de uppmuntrar Olika litteratur har f rs kt f rst hur design l ser problem f r att f rst designerns beteende och i slut ndan underl tta eller f rb ttra det Skillnader kan och har gjorts mellan olika typer av problemformuleringar och olika probleml sningsmetoder Denna avhandling syftar till att integrera tv tidigare distinkta litteraturomr den s kprocess ur det organisatoriska perspektivet som utvecklats av James G March Herbert A Simon Richard Cyert och andra samt Design och designprocessen ur perspektiv av f rfattare som Donald Schön Kees Dorst och Nigel Cross bland andra f r att f resl en typologi av design brief f r att underl tta problemformulering och d rmed ocks underl tta designprocessen Det enkla och omedelbara svaret p fr gan om vad som g r ett bra design brief r det beror p Det beror p designprocessen som ska f ljas om det finns en det beror p vilken typ av m l som ska uppn s den tillg ngliga tiden och det beror ocks p hur mycket och vad som r k nt om problemet och potentiella l sningar Baserat p detta artikuleras fyra idealtyper av design brief inklusive det f rv ntade
