Andrea Cesalpino and Renaissance Aristotelianism Fabrizio Baldassarri, Craig Martin, 2023-09-07 Shedding new light on the understudied Italian Renaissance scholar Andrea Cesalpino and the diverse fields he wrote on this volume covers the multiple traditions that characterize his complex natural philosophy and medical theories taking in epistemology demonology mineralogy and botany By moving beyond the established influence of Aristotle s texts on his work Andrea Cesalpino and Renaissance Aristotelianism reflects the rich influences of Platonism alchemy Galenism and Hippocratic ideas Cesalpino s relation to the new sciences of the 16th century are traced through his direct influences on cosmology botany and medicine In combining Cesalpino s reception of these traditions alongside his connections to early modern science this book provides a vital case study of Renaissance Aristotelianism

Renaissance Surgeons Kristy Wilson Bowers, 2022-11-09 This book examines the lives careers and publications of a group of Spanish Renaissance surgeons as exemplars of both the surgical renaissance occurring across Europe and of the unique context of Spain In the sixteenth century European surgeons forged new identities as learned experts who combined university medical degrees with manual skills and practical experience No longer merely apprentice trained craftsmen engaged only with healing the exterior wounds and rashes of the body these learned surgeons actively engaged with the epistemic shifts of the sixteenth century including new forms of knowledge construction based in empiricism and knowledge circulation based in printing These surgeons have long been overshadowed by the innovative work of anatomists and botanists but were participants in the same intellectual currents reshaping many aspects of knowledge Active in communities across both Castile and Aragon learned surgeons formed an intellectual community of practitioners and scholars who helped reshape surgical knowledge and practice This book provides an overview of the Spanish learned surgeons known as *médicos y cirujanos* who were influential in universities on battlefields at court and in private practice It argues that the surgeons larger significance rests in their collective identity as part of the broader intellectual shift to empiricism and innovation of the Renaissance Renaissance Surgeons Learning and Expertise in the Age of Print is essential reading for upper level students and scholars of the history of medicine and early modern Spain

The Routledge History of the Senses Andrew Kettler, Will Tullett, 2025-06-26 The Routledge History of the Senses presents readers with an overview of the field As well as pointing to directions for the future of the discipline it illustrates the extent to which the subject offers a considerable space for the exploration of diverse historical topics through the lens of sensory experience The handbook brings together essays and case studies from some of the leading academics on the history of the senses Together they not only chart topics and arguments in existing scholarship but introduce fresh methodologies for future analyses Specifically the chapters collectively show that the senses of the historical body often portray the intensity of the invasion of capital upon the functions of the mind throughout global history As a global history this work arrives at a time when many sensory historians are looking for a touchstone for moving beyond the often heavily Western frameworks that dominate the existing literature on the historical senses Not only will this book appeal to students and scholars of the history of senses visual studies art history food studies and many of the social sciences but individual chapters also offer useful reading material for a wide range of history modules and contemporary topics

Early Modern Architecture and Whiteness Dijana Omeragić Apostolski, Aaron White, 2025-02-28 Framing whiteness as a sensorial quality connate with ethical aesthetic epistemological and ontological hierarchies this edited volume examines how the category of whiteness shaped architectural theories and practices across the early modern period What was architecture s role in race making constructions of whiteness and processes of othering more generally How was whiteness architecturally questioned reinforced conceptualized practiced and materialized And how did whiteness intersect with categories such as class nation gender beauty hygiene and health In examining these questions this volume explores the ways in which premodern critical race studies allow us to reimagine the boundaries and possibilities of architectural research design and practice The book will be of interest to scholars working in architectural history art history early modern studies and the history of race

The Body of Evidence, 2020-02-17 When why and how was it first believed that the corpse could reveal signs useful for understanding the causes of death and eventually identifying those responsible for it The Body of Evidence Corpses and Proofs in Early Modern European Medicine edited by Francesco Paolo de Ceglia shows how in the late Middle Ages the dead body which had previously rarely been questioned became a specific object of investigation by doctors philosophers theologians and jurists The volume sheds new light on the elements of continuity but also on the effort made to liberate the semantization of the corpse from what were broadly speaking necromantic practices which would eventually merge into forensic medicine

Andreas Vesalius Sachiko Kusukawa, 2024-07-06 A revisionist biography of Andreas Vesalius the father of modern anatomy as deeply shaped by

Renaissance culture In 1543 the young and ambitious physician Andreas Vesalius published one of the most famous books in the history of medicine *On the Fabric of the Human Body* While we often think of dissection as destroying the body Vesalius believed that it helped him understand how to construct the human body In this book Sachiko Kusukawa shows how Vesalius's publication emerged from the interplay of Renaissance art printing technology and classical tradition She challenges the conventional view of Vesalius as a proto modern anti authoritarian father of anatomy through a more nuanced account of how Vesalius exploited cultural and technological developments to create a big and beautiful book that propelled him into imperial circles and secured his enduring fame **Andreas Vesalius and his Fabrica, 1537-1564** Vivian

Nutton,2024-10-03 This monograph presents a study of the most significant book in the history of anatomy Fleming Andreas Vesalius 1514 1564 *De humani corporis fabrica* Vesalius *Fabrica* was immediately recognised as changing the view of the human body when it was published in 1543 and it remains iconic today Despite this little has been written about Vesalius later revisions and corrections to the work as well as his annotations leading up to the book The author addresses this lacuna by examining the *Fabrica* from its inception in Paris in the 1530s through its publication in 1543 to subsequent revisions and its present status as an expensive treasure The book also contains new discoveries about the period of Vesalius earliest publications from 1537 8 the printing and production of the 1543 *Fabrica* and the extensive remaking of the 1555 edition Chapters also explore Vesalius background in new humanist medicine and anatomical teaching in Paris and Italy the verbal message that the *Fabrica* was intended to convey and the immediate responses to the book *Making Physicians* Evan R. Ragland,2022-04-19 How did medical students become Galenic physicians in the early modern era *Making Physicians* guides the reader through the ancient sources textbooks lecture halls gardens dissecting rooms and patient bedsides in the early decades of an important medical school Standard pedagogy combined book learning and hands on experience Professors and students embraced Galen's models for integrating reason and experience and cultivated humanist scholarship and argumentation which shaped their study of chymistry medical botany and clinical practice at patients bedsides in private homes and in the city hospital Following Galen's emphasis on finding and treating the sick parts professors correlated symptoms and the evidence from post mortems to produce new pathological knowledge Crocker-Langley San Francisco Directory ,1909
