Hoptopia Peter A. Kopp, 2016-09-06 Hoptopia argues that the current revolution in craft beer is the product of a complex global history that converged in the hop fields of Oregon's Willamette Valley. What spawned from an ideal environment and the ability of regional farmers to grow the crop rapidly transformed into something far greater because Oregon farmers depended on the importation of rootstock knowledge, technology, and goods not only from Europe and the Eastern United States but also from Asia, Latin America, and Australasia. They also relied upon a seasonal labor supply of people from all of these areas as a supplement to local Euroamerican and indigenous communities to harvest their crops. In turn, Oregon hop farmers reciprocated in exchanges of plants and ideas with growers and scientists around the world and of course sent their cured hops into the global marketplace. These global exchanges occurred not only during Oregon's golden era of hop growing in the late nineteenth and early twentieth centuries but through to the present in the midst of the craft beer revival. The title of this book Hoptopia is a nod to Portland's title of Beervana and the Willamette Valley's claim as an agricultural Eden from the mid nineteenth century onward. But the story is fundamentally about how seemingly niche agricultural regions do not exist and have never existed independently of the flow of people, ideas, goods, and biology from other parts of the world. To define Hoptopia is to define the Willamette Valley's hop and beer industries as the culmination of all of this local and global history. With the hop itself as a central character, this book aims to connect twenty-first century consumers to agricultural lands and histories that have been forgotten in an era of industrial food production. Provided by publisher How the Other Half Ate Katherine Leonard Turner, 2014-01-10 In the late nineteenth and early twentieth centuries, working-class Americans had eating habits that were distinctly shaped by jobs, families, neighborhoods, and the tools, utilities, and size of their kitchens along with their cultural heritage. How the Other Half Ate is a deep exploration by historian and lecturer Katherine Turner that delivers an unprecedented and thoroughly researched study of the changing food landscape in American working-class families from industrialization through the 1950s. Relevant to readers across a range of disciplines: history, economics, sociology, urban studies, women's studies, and food studies, this work fills an important gap in historical literature by illustrating how families experienced food and cooking during the so-called age of abundance. Turner delivers an engaging portrait that shows how America's working class in a multitude of ways has shaped the foods we eat today. **Popes, Peasants, and Shepherds** Oretta Zanini De Vita, 2013-03-26 The food of Rome and its region Lazio is redolent of herbs, olive oil, ricotta, lamb, and pork. It is the food of ordinary, frugal people, yet it is a very modern cuisine in that it gives pride of place to the essential flavors of its ingredients. In this only English language book to encompass the entire region, the award-winning author of Encyclopedia of Pasta, Oretta Zanini De Vita offers a substantial and complex social history of Rome and Lazio through the story of its food. Including more than 250 authentic, easy-to-follow recipes, the author leads readers on an exhilarating journey from antiquity through the Middle Ages to the mid twentieth century. **Becoming Salmon** Marianne
