Radio Happenings John Cage:

The Music of John Cage James Pritchett, 1996-03-14 The first book to examine fully the work of John Cage leading figure of the post war musical avant garde John Cage and David Tudor Martin Iddon, 2013-03-07 John Cage is best known for his indeterminate music which leaves a significant level of creative decision making in the hands of the performer But how much licence did Cage allow Martin Iddon s book is the first volume to collect the complete extant correspondence between the composer and pianist David Tudor one of Cage s most provocative and significant musical collaborators The book presents their partnership from working together in New York in the early 1950s through periods on tour in Europe until the late stages of their work from the 1960s onwards carried out almost exclusively within the frame of the Merce Cunningham Dance Company Tackling the question of how much creative flexibility Tudor was granted Iddon includes detailed examples of the ways in which Tudor realised Cage s work especially focusing on *Music of Changes* to *Variations II* to show how composer and pianist influenced one another s methods and styles *John Cage's Concert for Piano and Orchestra* Martin Iddon, Philip Thomas, 2020-05-01 John Cage s *Concert for Piano and Orchestra* is one of the seminal works of the second half of the twentieth century and the centerpiece of the middle period of Cage s output It is a culmination of Cage s work up to that point incorporating notation techniques he had spent the past decade developing techniques which remain radical to this day But despite Cage s vitality to the musical development of the twentieth century and the *Concert* s centrality to his career the work is still rarely performed and even more rarely examined in detail In this volume Martin Iddon and Philip Thomas provide a rich and critical examination of this enormously significant piece tracing its many contexts and influences particularly Schoenberg jazz and Cage s own compositional practice through a wide and previously untapped range of archival sources Iddon and Thomas explain the *Concert* through a reading of its many histories especially in performance from the legendary performer disobedience and audience disorder of its 1958 New York premiere to a no less disastrous European premiere later the same year They also highlight the importance of the piano soloist who premiered the piece David Tudor and its use alongside choreographer Merce Cunningham s *Antic Meet* A careful examination of an apparently bewildering piece the book explores the critical response to the *Concert* s performances re interrogates the mythology surrounding it and finally turns to the music itself in all its component parts to see what it truly asks of performers and listeners John Cage Sara Haefeli, 2017-12-06 This annotated bibliography uncovers the wealth of resources available on the life and music of John Cage one of the most influential and fascinating composers of the twentieth century The guide will focus on documentary studies archival resources scholarly research and autobiographical materials and place the composer and his work in a larger context of postmodern philosophy art and theater movements and contemporary politics It will support emerging scholarship and inquiry for future research on Cage with carefully selected sources and useful annotations **Radio Happenings I-V** John Cage, Morton Feldman, 1993 In 1966 67 radio station WBAI in New York City

invited composers John Cage and Morton Feldman to make 5 one hour radio conversations Unscripted and improvised they were free to talk about whatever they wished The fascinating conversations cover music politics sociology current events the arts and more This 224 page hardcover book comes with a DVD of the complete 5 hours of audio from the radio broadcasts mastered from the source closest to the original tapes This is the first time the audio has been officially released With a forward by composer Christian Wolff The DVD also contains a bonus slideshow of Cage scholar James Pritchett s text on the intriguing history of the audio to the Radio Happenings

The Graph Music of Morton Feldman David Cline, 2016-05-26 Morton Feldman is widely regarded as one of America s greatest composers His music is famously idiosyncratic but in many cases the way he presented it is also unusual because in the 1950s and 1960s he often composed in non standard musical notations including a groundbreaking variety on graph paper that facilitated deliberately imprecise specifications of pitch and at times other musical parameters Feldman used this notation intermittently over seventeen years producing numerous graph works that invite analysis as an evolving series Taking this approach David Cline marshals a wide range of source materials many previously unpublished in clarifying the ideology organisation and generative history of these graphs and their formative role in the chronicle of post war music This assists in pinpointing connections with Feldman s compositions in other formats works by other composers notably John Cage and contemporary currents in painting Performance practice is examined through analysis of Feldman s non notated preferences and David Tudor s celebrated interpretations

Changing the System: The Music of Christian Wolff Stephen Chase, 2016-04-08 Christian Wolff is a composer who has followed a distinctive path often at the centre of avant garde activity working alongside figures such as John Cage Merce Cunningham and Cornelius Cardew In a career spanning sixty years he has produced a significant and influential body of work that has aimed to address in a searching and provocative manner what it means to be an experimental and socially aware artist This book provides a wide ranging introduction to a composer often overlooked despite his influence upon many of the major figures in new music since the 1950s from Cage to John Zorn to the new wave of experimentalists across the globe As the first detailed analysis of the music of this prolific and highly individual composer Changing the System The Music of Christian Wolff contains contributions from leading experts in the field of new and experimental music as well as from performers and composers who have worked with Wolff The reception of Wolff s music is discussed in relation to the European avant garde and also within the context of Wolff s association with Cage and Feldman Music from his earliest compositions of the 1950s the highly indeterminate scores the politically inspired pieces up to the most recent works are discussed in detail both in relation to their compositional techniques general aesthetic development and matters of performance The particular challenges and aesthetic issues arising from Wolff s idiosyncratic notations and the implications for performers are a central theme Likewise the ways in which Wolff s political persuasions which arguably account for some of the notational methods he chooses have been worked out through his music are examined With a foreword by his close

associate Michael Parsons this is a valuable addition to experimental music literature **Invisible Fields** José Luis de Vicente, Honor Harger, Josep Perelló, 2011 With the invention of telecommunications technologies in the late nineteenth century the radio electric spectrum became a tool for rethinking the world in which we live The emission of radio waves did away with physical distances crossing borders and cultures and acting as a powerful catalyst for trade Moreover the radio spectrum is the invisible infrastructure on which our information and communication technologies have been built The history of its scientific discovery and how it was gradually colonized by the media the military complex and activists and hackers is one of the most fascinating stories of the twentieth century The future uses of the radio electric spectrum in the twenty first century and its new potential are being decided now with the end of analogue TV broadcasting worldwide marking the most important transformation of uses in the radio electric space in decades This catalog sets out to examine these issues and shed a little light on the most intriguing stories about the radio electric spectrum **New Music, New Allies** Amy C. Beal, 2006-07-04 Publisher Description **Composing Ambiguity: The Early Music of Morton Feldman** Alistair Noble, 2016-05-23 American composer Morton Feldman is increasingly seen to have been one of the key figures in late twentieth century music with his work exerting a powerful influence into the twenty first century At the same time much about his music remains enigmatic largely due to long standing myths about supposedly intuitive or aleatoric working practices In *Composing Ambiguity* Alistair Noble reveals key aspects of Feldman's musical language as it developed during a crucial period in the early 1950s Drawing models from primary sources including Feldman's musical sketches he shows that Feldman worked deliberately within a two dimensional frame allowing a focus upon the fundamental materials of sounding pitch in time Beyond this Feldman's work is revealed to be essentially concerned with the 12 tone chromatic field and with the delineation of complexes of simple proportions in crystalline forms Through close reading of several important works from the early 1950s Noble shows that there is a remarkable consistency of compositional method despite the varied experimental notations used by Feldman at this time Not only are there direct relations to be found between staff notated works and grid scores but much of the language developed by Feldman in this period was still in use even in his late works of the 1980s
