Radio One, Inc.

Radio One (Nasdaq: ROIA, ROIAK), the largest radio group targeting African-Americans in the country, had achieved tremendous success by purchasing underperforming radio stations, changing them to urban formats, and using its programming, marketing, and operating skills to cut unnecessary costs. Under the leadership of Alfred Liggins III, chief executive officer and president, the company posted consistent, above-average, same-station broadcast revenue and cash flow growth, and grew from 7 stations in 1995 to 28 in 1999.

In October 1999, two of the nation's largest owners of radio stations—Clear Channel Communications Inc. (NYSE: CCU) and AMFM Inc (NYSE: APM)—announced plans to merge. Scott Royster (HBS '92), chief financial officer and executive vice president of Radio One, knew that the Federal Communications Commission (FCC) would require Clear Channel to divest some of its radio assets after the proposed merger. The divestitures were an opportunity for Radio One to acquire 12 established urban stations in the top 50 markets. Acquiring those stations would more than double the size of Radio One and help build its national platform. Liggins and Royster had to decide if Radio One should purchase the stations and how much to offer.

The Company

Radio One was founded by Liggins's mother, Catherine Hughes, who learned the radio business while teaching at Howard University. In 1980, Hughes and her husband raised money to purchase WOL-AM in Washington, D.C., for just under \$1 million.¹ Hughes changed the format from R&B music and public affairs to talk radio.² To save money, the Hugheses themselves became radio personalities. As a result, Cathy Hughes became known as a hard-hitting political analyst and spokesperson. (Exhibit 1 contains brief biographies of the Radio One executives.)

In 1987, Hughes purchased WMMJ-FM in Washington for about \$7.5 million and began to broadcast a new musical format targeting African-Americans. In 1992 and 1993, Hughes acquired

¹ Broadcasting & Cable, "Mother/Son Makes Radio One," August 30, 1999. The Hugheses were the beneficiaries of a now defunct FCC regulation that allowed the sale of financially distressed radio assets to minorities at below-market prices.

Nick Mohammed examines the evolution of radio from its early uses as little more than a novelty into a set of powerful systems for international exchanges of news culture and political influence. In doing so the book follows the development of radio as a wireless form of the telegraph, its evolution into a medium for sound transmission across the air and its adaptation to digital networked audio and transmissions technologies. Mohammed also outlines the myriad changes in the radio industry in numerous contexts around the globe and over time, including the early development of commercial and non-commercial broadcasting in the United States, Europe, India, and China, and the evolution of so-called international broadcasters. As radio played a part in colonial politics, it also figured prominently in the politics of the post-colonial. Within the broader context of global radio, this book examines several former colonies and the transformation of radio from a tool of empire into an instrument of national development. It also focuses on instances in which developing nations have used radio to bridge the gap between rural audiences and digital networked technologies, connecting them to the global information superstructure. Scholars of media studies, communication, radio studies, international relations, and political science will find this book particularly useful.
