

Safety Notes on the Charging Unit and the Battery

- ⇒ Operate the charging unit at about room temperature and protect it against overheating (e.g. direct sun radiation).
- ⇒ Boost charging of NiCd batteries only in a temperature range between 50 °F and 104 °F (10 °C and 40 °C).
- ⇒ Protect the battery contacts against accidental shortening! – Use the protective caps delivered.
- ⇒ Do not store the batteries in a tool box or carry them loosely in your pocket. – A bunch of keys for example is enough to shorten the battery.
- ⇒ Pay attention to the correct polarity ! – After inserting the battery into the charging duct of the charging unit, the nameplate must be visible. Operation of the transmitter will not be possible otherwise !
- ⇒ The NiCd batteries are shipped from the factory uncharged and must be charged before use. It is normally necessary to remove the battery from the transmitter for charging processes.

2.4 Safety Notes Regarding Maintenance

- ⇒ Pay attention to smaller deficiencies. They are often the symptoms of a major defect and may result in severe malfunctions of the radio system.
- ⇒ Have defective radio systems repaired only by an expert. Use only original replacement parts of the manufacturer for any repair.
