MARK SCHEME for the October/November 2014 series**0625 PHYSICS****0625/31**

Paper 3 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2014 series for most Cambridge IGCSE®, Cambridge International A and AS Level components and some Cambridge O Level components.

Vladimir O. Safonov

October November 2014 Ms Paper 3:

Trustworthy Cloud Computing Vladimir O. Safonov, 2016-02-29 Introduces the topic of cloud computing with an emphasis on the trustworthiness of cloud computing systems and services This book describes the scientific basis of cloud computing explaining the ideas principles and architectures of cloud computing as well the different types of clouds and the services they provide The text reviews several cloud computing platforms including Microsoft Azure Amazon Oracle Google HP IBM Salesforce and Kaavo The author addresses the problem of trustworthiness in cloud computing and provides methods to improve the security and privacy of cloud applications The end of chapter exercises and supplementary material on the book s companion website will allow readers to grasp the introductory and advanced level concepts of cloud computing Examines cloud computing platforms such as Microsoft Azure Amazon Oracle Google HP IBM Salesforce and Kaavo Analyzes the use of aspect oriented programming AOP for refactoring cloud services and improving the security and privacy of cloud applications Contains practical examples of cloud computing test questions and end of chapter exercises Includes presentations examples of cloud projects and other teaching resources at the author s website <http://www.vladimirsafonov.org/cloud> Trustworthy Cloud Computing is written for advanced undergraduate and graduate students in computer science data science and computer engineering as well as software engineers system architects system managers and software developers new to cloud computing

Machine Design with CAD and Optimization Sayed M.

Metwalli, 2021-04-08 MACHINE DESIGN WITH CAD AND OPTIMIZATION A guide to the new CAD and optimization tools and skills to generate real design synthesis of machine elements and systems Machine Design with CAD and Optimization offers the basic tools to design or synthesize machine elements and assembly of prospective elements in systems or products It contains the necessary knowledge base computer aided design and optimization tools to define appropriate geometry and material selection of machine elements A comprehensive text for each element includes a chart excel sheet a MATLAB program or an interactive program to calculate the element geometry to guide in the selection of the appropriate material The book contains an introduction to machine design and includes several design factors for consideration It also offers information on the traditional rigorous design of machine elements In addition the author reviews the real design synthesis approach and offers material about stresses and material failure due to applied loading during intended performance This comprehensive resource also contains an introduction to computer aided design and optimization This important book Provides the tools to perform a new direct design synthesis rather than design by a process of repeated analysis Contains a guide to knowledge based design using CAD tools software and optimum component design for the new direct design synthesis of machine elements Allows for the initial suitable design synthesis in a very short time Delivers information on the utility of CAD and Optimization Accompanied by an online companion site including presentation files Written for students of engineering design mechanical engineering and automotive design Machine Design with CAD and Optimization contains the

new CAD and Optimization tools and defines the skills needed to generate real design synthesis of machine elements and systems on solid ground for better products and systems

System Level ESD Co-Design Charvaka Duvvury, Harald Gossner, 2015-08-04 An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000 4 2 is paramount for any system design This pioneering book presents the collective knowledge of system designers and system testing experts and state of the art techniques for achieving efficient system level ESD protection with minimum impact on the system performance All categories of system failures ranging from hard to soft types are considered to review simulation and tool applications that can be used The principal focus of System Level ESD Co Design is defining and establishing the importance of co design efforts from both IC supplier and system builder perspectives ESD designers often face challenges in meeting customers system level ESD requirements and therefore a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance With contributions from Robert Ashton Jeffrey Dunnihoo Micheal Hopkins Pratik Maheshwari David Pomerence Wolfgang Reinprecht and Matti Usumaki readers benefit from hands on experience and in depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD robust systems that include mobile and automotive applications The first dedicated resource to system level ESD co design this is an essential reference for industry ESD designers system builders IC suppliers and customers and also Original Equipment Manufacturers OEMs Key features Clarifies the concept of system level ESD protection Introduces a co design approach for ESD robust systems Details soft and hard ESD fail mechanisms Detailed protection strategies for both mobile and automotive applications Explains simulation tools and methodology for system level ESD co design and overviews available test methods and standards Highlights economic benefits of system ESD co design

Core Values: the Role of Core in Twenty-first Century Reservoir Characterization A. Neal, M. Ashton, L.S. Williams, S.J. Dee, T.J.H. Dodd, J.D. Marshall, 2023-11-21 Deep subsurface characterization technologies and demands are changing rapidly within the energy industry In this swiftly evolving landscape the wide range of analyses performed on the rocks and fluids obtained from cores remain fundamental tools in managing subsurface uncertainty and associated risk During the energy transition large volumes of newly acquired and legacy core will be accessed to better understand both existing hydrocarbon resources and other subsurface energy related systems particularly for carbon capture utilization and storage CCUS geothermal energy and the long term storage of nuclear waste Through state of the art reviews and case studies this volume illustrates how innovative approaches continue to create value from both new and historical cores recovered for deep subsurface reservoir characterization and storage complex evaluation Such an assessment is timely given that the sector sits at a pivotal point in terms of changing technologies economics demographics skillsets and energy solutions

Pre-Clinical Medicine Calver Pang, Ibraiz Hussain, John Mayberry, 2017-09-18 Filling a gap for a pre clinical phase revision guide this book will help medics

pass their intermediate exams in order to proceed to the clinical years It is based on the SAQs EMQs and MCQ school curriculum as set out by the GMC By covering each module individually but also integrating other disciplines of medicine into the questions it helps students to think laterally as well as thoroughly revising each module With a minimum of 4 SAQs 7 MCQs and 3 EMQs in each chapter this book offers comprehensive revision practice as well as providing all the answers with clear explanations

Integrative Understanding of Shale Gas Reservoirs Kun Sang Lee,Tae Hong Kim,2016-02-03 This timely book begins with an overview of shale gas reservoir features such as natural fracture systems multi fractured horizontal wells adsorption desorption of methane and non linear flow within the reservoir Geomechanical modelling an aspect of importance in ultra low permeability reservoirs is also presented in detail Taking these complex features of shale reservoirs into account the authors develop a numerical model which is verified with field data using the history matching technique Based on this model the pressure transient and production characteristics of a fractured horizontal well in a shale gas reservoir are analysed with respect to reservoir and fracture properties Methods for the estimation of shale properties are also detailed Minifrac tests rate transient tests RTA and type curve matching are used to estimate the initial pressure permeability and fracture half length Lastly future technologies such as the technique of injecting CO₂ into shale reservoirs are presented The book will be of interest to industrial practitioners as well as to academics and graduate students in the field of reservoir engineering

Nanoengineering Patricia I. Dolez,2015-05-26 Nanoengineering Global Approaches to Health and Safety Issues provides a global vision on the impact of engineered nanomaterials both for the consumer general public and in occupational settings The book also presents a hint on what can be expected for the future from nanomaterials and their effects on our lives both at home and at work In addition users will find valuable information on nanomaterials irreplaceable value and their risks for health safety and environmental issues Case studies illustrate key points and provide information on important processes Provides a global vision on the different aspects related to nanosafety and a synthesis of the information available Gives all the information required for precision decision making in a single book offering both general public and occupational aspects Contains separate chapters on each subject written by world renowned contributors Presents a complete vision of the problem with perspectives on global approaches Includes case studies that illustrate important processes

Carbonate Reservoirs: Applying Current Knowledge to Future Energy Needs J. Garland,,A.J. Barnett,,T.P. Burchette,V.P. Wright,2025-05-07 More than a century of exploitation of carbonate petroleum reservoirs has placed the geoscience subsurface community in a strong position to supply a wealth of knowledge and technology to our future energy needs This Special Publication presents the latest research from carbonate oil and gas fields and demonstrates how the skills and workflows learnt in this industry can be directly applied to geothermal and radioactive waste disposal evaluations in carbonate successions A common theme running through the volume is the importance of recognizing high permeability zones which can have an enormous impact on producibility whether in oil gas or geothermal reservoirs As we

transition to alternative energy sources this Special Publication looks back on the positive contributions of the oil and gas industry to our scientific knowledge and understanding and discusses the ways in which carbonate and associated evaporite successions will play a critical role in our future energy needs *Routledge Handbook of Youth Sport* Ken Green, Andy Smith, 2016-01-08 The Routledge Handbook of Youth Sport is a comprehensive survey of the latest research into young people's involvement in sport Drawing on a wide diversity of disciplines including sociology psychology policy studies coaching physical education and physiology the book examines the importance of sport during a key transitional period of our lives from the later teenage years into the early twenties and therefore helps us develop a better understanding of the social construction of young people's lives The book covers youth sport in all its forms from competitive game contests and conventional sport to recreational activities exercise and lifestyle sport and at all levels from elite competition to leisure time activities and school physical education It explores youth sport across the world in developing and developed countries and touches on some of the most significant themes and issues in contemporary sport studies including physical activity and health lifelong participation talent identification and development and safeguarding and abuse No other book brings together in one place such a breadth and depth of material on youth sport or the engagement of young people in physical activity The Routledge Handbook of Youth Sport is therefore important reading for all advanced students researchers practitioners and policy makers with an interest in youth sport youth culture sport studies or physical education *Biosignal Processing and Computational Methods to Enhance Sensory Motor Neuroprosthetics* Mitsuhiro Hayashibe, David Guiraud, Jose L. Pons, Dario Farina, 2016-01-22 Though there have been many developments in sensory motor prosthetics they have not yet reached the level of standard and worldwide use like pacemakers and cochlear implants One challenging issue in motor prosthetics is the large variety of patient situations which depending on the type of neurological disorder To improve neuroprosthetic performance beyond the current limited use of such systems robust bio signal processing and model based control involving actual sensory motor state with biosignal feedback would bring about new modalities and applications and could be a breakthrough toward adaptive neuroprosthetics Recent advances of Brain Computer Interfaces BCI now enable patients to transmit their intention of movement However the functionality and controllability of motor prosthetics itself can be further improved to take advantage of BCI interfaces In this Research Topic we welcome contribution of original research articles computational and experimental studies review articles and methodological advances related to biosignal processing that may enhance the functionality of sensory motor neuroprosthetics The scope of this topic includes but is not limited to studies aimed at enhancing 1 computational biosignal processing in EMG Electromyography EEG Electroencephalography and other modalities of biofeedback information 2 the computational method in modeling and control of sensory motor neuroprosthetics 3 the systematic functionality aiming to provide solutions for specific pathological movement disorders 4 human interfaces such as BCI but in the case of BCI study manuscripts should be experimental studies which are applied to sensory motor

neuroprosthetics in patients with motor disabilities

Consumer Involvement in Private EU Competition Law Enforcement

Maria Ioannidou, 2015-09-03 Despite the growing importance of consumer welfare in EU competition law debates there remains a significant disconnect between rhetoric and reality as consumers and their interests still play only an ancillary role in this area of law Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject providing a timely and wide ranging examination of the need for more active consumer participation in competition law Written by an expert in the field it sets out a comprehensive framework of policy implications and arguments for greater involvement positioning the debate in the context of a broader EU law perspective It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment Finally the book identifies key institutional and political obstacles to the adoption of effective measures and suggests alternative routes to enhance the role of consumers in private competition law enforcement The book's innovative approach combining normative analysis and practical solutions make it invaluable for academics policy makers and practitioners in the field

Transforming Payment Systems in Europe Jakub Górk, 2016-04-08

The European payment market has undergone rapid transformation in recent years due to changes in payment habits new business rules and new legal frameworks and regulation There has also been an advent of new technologies and payment solutions which has altered the European payments landscape drastically This book provides an overview of the fundamental issues involved in this new payments landscape The authors discuss fundamental problems such as substitution between cash and non cash payment instruments payment costs the economics of fees and the demand for cash and deposit money They also analyse issues such as two sided markets business platforms and the problem of critical mass Other chapters focus on new phenomena in payments such as mobile payments multi sided platforms electronic wallets virtual currencies decentralised ledgers private digital currencies blockchain and instant payments The authors also review existing regulation for the topic including the revised Payment Services Directive PSD2 Interchange Fee Regulation IF MIF Reg and the Single Euro Payments Area SEPA project Transforming Payment Systems in Europe offers insight into changing payment culture and the ways in which new payment systems can create a single digital market to foster further integration in Europe

China-Taiwan Rapprochement

Min-Hua Chiang, 2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China It goes beyond a consideration of trade and investment flows and discusses also the large population flows the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level It considers the impact of growing economic integration on society and politics assesses how China Taiwan economic integration is affecting the East Asian region more widely and explores the implications for international relations including the United States dominance in the region Overall the book presents a comprehensive analysis of all the issues

CNS Recovery after Structural and/or

Physiological/Psychological Damage Marie Moftah, Emmanuel Moyse, 2016-11-23 There is an assumption that environmental threats could cause important damages in central nervous system As a consequence several forms of brain structural plasticity could be affected The environmentally mediated risks include generally physical such as brain and spinal cord injury and psychological psychosocial influences e g stress In general the response of the organism to these environmental challenges passes via adaptive responses to maintain homeostasis or functional recovery These processes engage the immune system the autonomic nervous system ANS besides the hypothalamo hypophyseal adrenal HPA axis via specific hormones neurotransmitters neuropeptides and other factors which participate in several cases in structural remodeling in particular brain areas To what extent a brain and or spinal cord recovery after structural and or physiological psychological damage could occur and by which mechanisms this is the goal of this Research Topic It concerns neurogenesis growth factors and their receptors and morphological plasticity On the other hand it is well known that stress experienced an obvious impact on many behavioral and physiological aspects Thus environmental stress affects neuroendocrine structure and function and hence such aspects may influence brain development Knowing normal organization of neurotensin receptors system during postnatal development in human infant will help understanding the dysfunction of this neuropeptidergic system in sudden infant syndrome victims Stress could affect also other non neuroendocrine regions and systems GABA is one of the classical neurotransmitter sensitive to stress either when applied acutely or repetitively as well as its receptor GABAA Furthermore the modulation of this receptor complex notably by neurosteroids is also affected by acute stress These steroids seem to play a role in the resilience retained by the stressed brain Their modulatory role will be studied in the context of chronic stress in rats Finally one of the major impacts of stress besides changes in psychological behavior is the alteration of food intake control causing in final eating disorders This alteration is the result of changes occurring in activity of brain regions involved in stress responses principally HPA and ANS and which are also involved in food intake control The series of studies presented here will try to explain how different stress paradigms affect this function and the eventual interactions of glucocorticoids with orexigenic neuropeptide Y NPY Agouti Related Peptide AgRP and anorexigenic peptides Pre opiomelanocortin peptide POMC Cocaine Amphetamine regulatory Transcript peptide CART

Parliamentarians' Professional Development Colleen Lewis, Ken Coghill, 2015-12-09 This book addresses the education and training of Members of Parliament MPs It examines existing training programs offered in various countries around the world evaluates their strengths and weaknesses and makes recommendations for a new approach which aligns the professional development of MPs to 21st century requirements Contributors address the role of parliamentarians how to prepare them for their multi faceted functions the importance of ethics in any program the requirement for more sophisticated adult learning approaches human resource implications and the need to reform existing education and training models The book will appeal to scholars in the fields of political science adult education and human resource management as

well as to parliamentarians interested in enhancing their skills so as to perform more efficiently and effectively

Understanding EU Decision-Making Edward Best, 2016-02-04 This book presents in a concise and accessible way why the EU institutional system exists in its present form how the EU fits into the world as a system of governance and who is involved in EU policy processes It outlines the historical context which has shaped the EU system gives a summary of the system's basic principles and structures and describes its actors procedures and instruments The main theme is to show that EU decision making is not just a matter of action at some higher and separate level of them and us but rather that it involves different forms of cooperation between European national and regional authorities as well as interaction between public and private actors Numerous short case studies illustrate how people's day to day activities are affected by EU decisions and how individuals' concerns are represented in the decision making process The book provides insights and examples which will be very helpful for all students of European integration It will also be a valuable resource for European citizens wishing to

understand the basic realities and rationales as well as some of the dilemmas behind EU policy making **Satire** John T. Gilmore, 2017-12-02 What is satire How can we define it Is it a weapon for radical change or fundamentally conservative Is satire funny or cruel Does it always need a target or victim Combining thematic theoretical and historical approaches John T Gilmore introduces and investigates the tradition of satire from classical models through to the present day In a lucid and engaging style Gilmore explores the moral politics of satire whether satire is universal historically or geographically limited how satire translates across genres and media the boundaries of free speech and legitimacy Using examples from ancient Egypt to Charlie Hebdo from European traditions of formal verse satire to imaginary voyages and alternative universes newspaper cartoons and YouTube clips from the Caribbean to China this comprehensive volume should be of interest to students and scholars of literature media and cultural studies as well as politics and philosophy The Urban Tree Duncan

Goodwin, 2017-04-07 There is a growing evidence base that documents the social environmental and economic benefits that urban trees can deliver Trees are however under threat today as never before due to competition for space imposed by development other hard infrastructures increased pressure on the availability of financial provision from local authorities and a highly cautious approach to risk management in a modern litigious society It is therefore incumbent upon all of us in construction and urban design disciplines to pursue a set of goals that not only preserve existing trees where we can but also ensure that new plantings are appropriately specified and detailed to enable their successful establishment and growth to productive maturity Aimed at developers urban planners urban designers landscape architects and arboriculturists this book takes a candid look at the benefits that trees provide alongside the threats that are eliminating them from our towns and cities It takes a simple applied approach that explores a combination of science and practical experience to help ensure a pragmatic and reasoned approach to decision making in terms of tree selection specification placement and establishment In this way trees can successfully be incorporated within our urban landscapes so that we can continue to reap the benefits they

provide *"One Rotten Apple Spoils the Whole Barrel": The Plant Hormone Ethylene, the Small Molecule and its Complexity*
Domenico De Martinis, Tomotsugu Koyama, Caren Chang, 2015-08-14 The gaseous molecule ethylene C₂H₄ which is small in size and simple in structure is a plant hormone most often associated with fruit ripening yet has a diversity of effects throughout the plant life cycle While its agricultural effects were known even in ancient Egypt the complexity of its mode of action and the broad spectrum of its effects and potential uses in plant physiology remain important scientific challenges today In the last few decades the biochemical pathway of ethylene production has been uncovered ethylene perception and signaling have been molecularly dissected ethylene responsive transcription factors have been identified and numerous effects of ethylene have been described ranging from water stress development senescence reproduction plant pathogen interactions and of course ripening Thus ethylene is involved in plant development in biotic and abiotic stress and in reproduction There is no stage in plant life that is not affected by ethylene modulated by a complex and fascinating molecular machinery
