Primates Alfred L. Rosenberger,2023-08-28 This book is an accessible and comprehensive introduction to primates It provides both a survey and synthesis of primate history biology and behavior As a survey it offers a focused review of living and extinct primates in regional and community frameworks As a synthesis it applies the community perspective in a unique way to explore primates adaptive diversity in the context of how evolution works The book encourages students to study primates as integrated members of regional communities ecologically historically and evolutionarily The chapters are organized to emphasize the patterns of primate radiations in the four regions of the world where primates live and to facilitate comparisons among the radiations The overviews of communities illustrate how the ecological adaptations of different species and taxonomic or phylogenetic groups enable them to coexist Illustrations and tools to aid students learning include case studies photographs figures tables charts key concepts and quizlets to self test This book is an ideal introduction for students studying nonhuman primates primatology primate behavior or primate ecology

Mobile-Mindful Teaching and Learning Christina Moore,2023-07-03 This book provides faculty and instructors with an introductory guide to integrating mobile learning in their courses Recognizing that a smartphone is the first and main piece of technology anyone owns with ownership exceeding 95% for those aged 18 29 with a sizable minority of these being smartphone dependent and that instructors are relying on technology for teaching and learning more than ever this book addresses the imperative that course materials and interactions be increasingly available through the technology that students use most often Dispelling the notion that mobile learning is for the tech savvy and adventurous mobile mindful teaching offers teachers a way to take a few steps at a time share options with students and

progressively develop ideas and practices The book invites you to explore your own way into mobile learning Christina Moore stresses two principles as you engage with mobile learning intention and fluidity This begins with mindfully implementing mobile learning opportunities so that students see the usefulness of learning via phone and recognizing the fluid learning environments in which students learn so you can offer online modalities and functions appropriate to purpose and situations The book opens with a start with self section on How to Be a Mobile Mindful Learner offering ideas on exploring the almost infinite available online resources in your discipline to curate a rich and ever expanding compilation of ideas for use in your scholarly work and teaching and identifying different types of learning digital reading audio and visual learning and social learning across multiple devices and contexts to consider as you develop your course The section Toward Mobile Mindful Teaching explores ways to add mobile options to existing learning materials and how they and the LMS functions you use are rendered on a phone by taking a mobile test drive through your course Christina Moore shows how by building up your mobile learning skills to be a more productive scholar and developing habits that feed your curiosity and creativity you can start planning how you can create fluid learning opportunities for your students they can access across devices time and space and take advantage of found moments of time and informal spaces *A Teacher's Guide to Learning Student Names*

Michelle D. Miller,2024-11-12 If teachers want an inclusive engaging classroom they must learn their students names Sound advice certainly but rarely does it come with practical guidance which is precisely what this book offers Eschewing the random tips and mnemonic tricks that invariably fall short Michelle D Miller offers teachers a clear explanation of what is really going on when we learn a name and a science based approach for using this knowledge to pedagogical advantage Drawing on a deep background in the psychology of language and memory Miller gives a lively overview of the surprising science of learning proper names along with an account of why the practice is at once so difficult and yet so critical to effective teaching She then sets out practical techniques for learning names with examples of activities and practices tailored to a variety of different teaching styles and classroom configurations In her discussion of certain factors that can make learning names especially challenging Miller pays particular attention to neurodivergence and the effects of aging on this special form of memory *A Teacher's Guide to Learning Student Names* lays out strategies for putting these techniques into practice suggests technological aids and other useful resources and explains how to make name learning a core aspect of one's teaching practice With its research based strategies and concrete advice this concise and highly readable guide provides teachers of all disciplines and levels an invaluable tool for creating a welcoming and productive learning environment
