R Dawkins Neil Book:

Even Dawkins Has a God Neil Laing, 2014-08-27 Richard Dawkins The God Delusion is one of the most serious attacks on religion in recent times A number of highly capable authors have countered it Neils reply is different from most He finds areas of agreement with Dawkins over a number of his assessments of religion while exposing his erroneous understanding of the nature of God He shows that Dawkins attack on God is irrelevant even though he successfully demolishes what he imagines is the Christian god At the same time Neil tries to equip Christians to come to an informed intelligent position to lose their fears of science and to see its wonderful strengths He challenges the assumptions made particularly by the New Atheists in imagining that faith is a childish approach to origins and furthermore that their own views are similar to some religions so that they virtually have a god themselves Tackling thorny topics like the meaning of faith miracles morality and righteousness Neil honestly appraises Christian views tries to debunk misconceptions about these topics and shows that science and faith can be mutually enhancing

The Magic of Reality Richard Dawkins, 2011-10-04 Magic takes many forms Supernatural magic is what our ancestors used in order to explain the world before they developed the scientific method The ancient Egyptians explained the night by suggesting the goddess Nut swallowed the sun The Vikings believed a rainbow was the gods bridge to earth The Japanese used to explain earthquakes by conjuring a gigantic catfish that carried the world on its back earthquakes occurred each time it flipped its tail These are magical extraordinary tales But there is another kind of magic and it lies in the exhilaration of discovering the real answers to these questions It is the magic of reality science Packed with clever thought experiments dazzling illustrations and jaw dropping facts The Magic of Reality explains a stunningly wide range of natural phenomena What is stuff made of How old is the universe Why do the continents look like disconnected pieces of a puzzle What causes tsunamis

Why are there so many kinds of plants and animals Who was the first man or woman This is a page turning graphic detective story that not only mines all the sciences for its clues but primes the reader to think like a scientist as well Richard Dawkins the world s most famous evolutionary biologist and one of science education s most passionate advocates has spent his career elucidating the wonders of science for adult readers But now in a dramatic departure he has teamed up with acclaimed artist Dave McKean and used his unrivaled explanatory powers to share the magic of science with readers of all ages This is a treasure trove for anyone who has ever wondered how the world works Dawkins and McKean have created an illustrated guide to the secrets of our world and the universe beyond that will entertain and inform for years to come **Things**

Atheists Say Patrick Prill,2021-01-13 There is a new breed of atheist in town They re intelligent vocal and sometimes very aggressive They communicate with boldness and conviction but are they correct After all many of the things they say simply make no sense Patrick Prill examines the ideas of several modern atheists and a few atheists of the past Stephen Hawking Richard Dawkins Victor Stenger Paul Kurtz Peter Singer Alex Rosenberg Christopher Hitchens Sam Harris Bertrand Russell and Friedrich Nietzsche to name a few Many of them are well known and highly regarded but does everything they say really make sense Is their case for atheism sound This book addresses thirty six of the most common things atheists say when they challenge people of faith After examining what prominent atheists passionately proclaim in light of evidence and reason it seems the case for God s existence emerges stronger than ever *My Heresies* Michael Jean Nystrom-Schut,2016-06-25

In the mind of each person on the planet a set of notions and ideas of God or gods reside Some of these systems are basic and simple Others are highly complex and complicated Some borrow their God god notions from authority or from others they know Others are much more original eclectically piecing together many separate parts from multiple sources No two people in the world experience and translate God gods in the same way And this is what makes things so interesting As I have encountered this wonderful life I have also bumped up against countless people who were in the position to explain exactly who God was and was not They were quite sure of themselves and anxious to impart this wisdom to me But because I had a mind and heart of my own this put me on the outside looking in for much of my life We all come to a place where we realize we must make our minds up as to what we will and will not do how we will think and who we will be As I have encountered them and their God gods I have found my own way through this foggy maze and discovered a modicum of peace and reconciliation in the process This is the massive task of all of us as well as why I needed to lay it out to you in this lengthy 2 part book **Their God/S** Michael Jean Nystrom-Schut,2015-11-19

In the mind of each person on the planet a set of notions and ideas of God or gods reside Some of these systems are basic and simple Others are highly complex and complicated Some borrow their God god notions from authority or from others they know Others are much more original eclectically piecing together many separate parts from multiple sources No two people in the world experience and translate God gods in the same way And this is what makes things so interesting As I have encountered this wonderful life I have also bumped up

against countless people who were in the position to explain exactly who God was and was not They were quite sure of themselves and anxious to impart this wisdom to me But because I had a mind and heart of my own this put me on the outside looking in for much of my life We all come to a place where we realize we must make our minds up as to what we will and will not do how we will think and who we will be As I have encountered them and their God gods I have found my own way through this foggy maze and discovered a modicum of peace and reconciliation in the process This is the massive task of all of us as well as why I needed to lay it out to you in this lengthy 2 part book Consecrating Science Lisa H.

Sideris,2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe

humanist secularism The stories celebrate scientific knowledge rally against organized religion and recount memories of the author living under an oppressive regime as a kid Some express a desire to see more people reach for the stars in an effort to shake off the cloak of ignorance once and for all that is holding humanity back from reaching its full potential These stories are to be read and understood from the point of view that human beings curious by nature are to continue the exploration they started millions of years ago wondering off the plains of Africa in search of a better life culminating in the conquest of space After all every atom in the human body was once born inside the nuclear furnace of giant stars it is only fitting that our journey leads us back to the same space from where once we came

The Sagan Conspiracy Donald L.

Zygutis, 2016-11-21 Mainstream SETI scientists and ancient alien theorists don't agree on much but one opinion they share is that the undisputed authority on the possibility of alien existence was the late Carl Sagan 1934-1996 whose voluminous writings on the subject have had a profound influence on ETI research But how many Carl Sagan fans know that while the renowned scientist was at Stanford University he produced a controversial paper funded by a NASA research grant that concludes ancient alien intervention may have sparked human civilization Author Donald Zygutis lays out a compelling case that points to a cover up by the Pentagon and NASA who may have buried it soon after it was written How significant is the Stanford Paper The answer may lie in another question How would a science backed theory and search strategy to guide the discovery of alien artifacts among our own ancient civilizations impact the worldwide institutions of government religion and culture Recently rediscovered by the author Sagan's lost Stanford paper is the central theme of *The Sagan Conspiracy* Groundbreaking research and paradigm changing material challenges conventional thinking about the People's Scientist and maybe even the origins of human society Sagan even conceived of the likelihood that the ancient Sumerian civilization had been visited and influenced by beings from other worlds as evidenced by ancient manuscripts among other artifacts As we celebrate the 20 year anniversary of Carl's death *The Sagan Conspiracy* is sure to fundamentally alter how the world thinks about extraterrestrials
