

Omegalarm D4112 Control/Communicator Specifications Sheet

Description

The D4112 is an integrated Control/Communicator. It has six end-of-line resistor supervised, handwire protective zones — five standard programmable zones and one nominal 12 VDC powered zone optimized for two-wire smoke detectors. In addition to the six handwire zones, three programmable software zones can be used to initiate special signals (such as panic or duress alerts) from a Command Center. Up to 250 mA of current is available for auxiliary 12 VDC powered devices, as well as 1.5 A at 12 VDC nominal for alarm annunciating devices. The D4112 has been designed and rigorously tested to withstand radio frequency interference and high voltage surges common to lightning strikes.

The D4112's built-in communicator has the ability to report to two telephone numbers (primary and alternate). The alternate central station telephone number is used to back up signals that were not received at the primary number.

D420 Command Center

The D4112 communicates to the D420 Command Center through a four-conductor cable. One or two Command Centers can be connected to the D4112 providing complete system control to the user.

The D420 Command Center is an aesthetically pleasing, low profile, surface mount unit. The system status is displayed with indicator LEDs for Perimeter Arm, Interior Arm, AC Power, and Command Mode. Individual zone status LEDs announce the condition of each of the six protective zones. Two function keys are pre-programmed to perform one-touch command functions (Command 44 and Command 47).

Two Wire Devices

Zone 1 of the D4112 is a fully programmable two-wire powered zone which is optimized for smoke and heat detectors. Up to ten smoke detectors can be installed with heat detectors on this zone. Smoke and heat detectors cannot be combined with other types of detection devices on this zone. To be in compliance with U.L. 96B and NFPA 74, only smoke detectors shown on Radionics Technogram 473-05414-000 can be used with this panel.

NOTE: For Household Fire Alarm applications, smoke and heat detectors can only be placed on Zone 1. Zone

1 can be used from any system Command Center using function key 6 (or Command 47).

Programming

Programming the D4112 security system is accomplished with the Radionics DS100 Bar Code Programmer. This is the same programmer that is used with the D6112 and D6112-Control/Communicators and the D6500 Security Receiver.

The 4112-MAM Product Handler is arranged in twelve different sections, called "modules." Each module contains program items which relate to a specific function of the D4112 security system. Programming the system, and reviewing and accessing entries is simple and fast.

A unique, sturdy, 4-wire, DS100 Programmer Interface Cord connects the DS100 to the D4112.

Remote Account Manager

To complement the D4112 Control/Communicator, Radionics offers a remote programming package. D4112, D6112 and D6112 security systems can be programmed and armed from a central station or your customer service office. With the R.A.M., programs can be changed or edited at any time. It can also perform remote system diagnostics, and troubleshoot a system over the telephone line. If the trouble cannot be corrected over the phone, problem codes can be typecast until your service team can respond.
