Smart Cities and finally the Urb IOT 2020 International Conference on IoT in Urban Space **Middleware Solutions for Wireless Internet of Things** Paolo Bellavista, Carlo Giannelli, Sajal K. Das, Jiannong Cao, 2019-07-15 The proliferation of powerful but cheap devices together with the availability of a plethora of wireless technologies has pushed for the spread of the Wireless Internet of Things WIoT which is typically much more heterogeneous dynamic and general purpose if compared with the traditional IoT The WIoT is characterized by the dynamic interaction of traditional infrastructure side devices e.g. sensors and actuators provided by municipalities in Smart City infrastructures and other portable and more opportunistic ones such as mobile smartphones opportunistically integrated to dynamically extend and enhance the WIoT environment A key enabler of this vision is the advancement of software and middleware technologies in various mobile related sectors ranging from the effective synergic management of wireless communications to mobility adaptivity support in operating systems and differentiated integration and management of devices with heterogeneous capabilities in middleware from horizontal support to crowdsourcing in different application domains to dynamic offloading to cloud resources only to mention a few The book presents state of the art contributions in the articulated WIoT area by providing novel insights about the development and adoption of middleware solutions to enable the WIoT vision in a wide spectrum of heterogeneous scenarios ranging from industrial environments to educational devices The presented solutions provide readers with differentiated point of views by demonstrating how the WIoT vision can be applied to several aspects of our daily life in a pervasive manner **Cyber Sovereignty** Lucie Kadlecová, 2024-06-11 Governments across the globe find themselves in an exploratory phase as they probe the limits of their sovereignty in the cyber domain Cyberspace is a singular environment that is forcing states to adjust their behavior to fit a new arena beyond the four traditional domains air sea space and land to which the classic understanding of state sovereignty applies According to Lucie Kadlecov governments must implement a more adaptive approach to keep up with rapid developments and innovations in cyberspace in order to truly retain their sovereignty This requires understanding the concept of sovereignty in a more creative and flexible manner Kadlecov argues that the existence of sovereignty in cyberspace is the latest remarkable stage in the evolution of this concept Through a close study of the most advanced transatlantic cases of state sovereignty in cyberspace the Netherlands the US Estonia and Turkey Cyber Sovereignty reveals how states have pursued new methods and tactics to fuel the distribution of authority and control in the cyber field imaginatively combining modern technologies with legal frameworks In times of booming competition over cyber governance between democracies and authoritarian regimes worldwide cyber sovereignty is a major topic of interest and concern for the international community *Smittestopp – A Case Study on Digital Contact Tracing* Ahmed Elmokashfi, Olav Lysne, Valeriya Naumova, 2022-07-19 This open access book describes Smittestopp the first Norwegian system for digital contact tracing of Covid 19 infections which was developed in March and early April 2020 The system was deployed after five weeks of development and was active for a little more than two months when a drop in infection levels in

Norway and privacy concerns led to shutting it down The intention of this book is twofold First it reports on the design choices made in the development phase Second as one of the only systems in the world that collected population data into a central database and which was used for an entire population we can share experience on how the design choices impacted the system s operation By sharing lessons learned and the challenges faced during the development and deployment of the technology we hope that this book can be a valuable guide for experts from different domains such as big data collection and analysis application development and deployment in a national population as well as digital tracing
