

Computer and Network Maintenance Checklist

To keep Chronicle (and your computer system in general) performing well, the network administrator should regularly do each of the following:

On Servers & Workstations

- ☐ Check for and install Windows updates.
- ☐ Check for and install Office updates.
- ☐ Check Windows event logs, and correct ALL errors and potential issues identified there.
- ☐ Monitor and maintain virus protection.
- ☐ Check for games, memory-intensive screen savers, and other programs that shouldn't be installed. It's especially important that no one install/play games or run other programs directly from the Chronicle server; this can seriously affect performance. If any inappropriate programs are found, uninstall them and notify management as necessary.
- ☐ Check with users to see if they are experiencing any computer or software problems.
- ☐ Periodically clean machines internally.

On Workstations Only

- ☐ Periodically defragment the hard drive.
- ☐ Regularly run Spybot and Ad-aware to scan for and remove ad and spyware. (This should be unnecessary on servers since users should never browse the Internet directly from a server.)

On the Servers Only

- ☐ Monitor drive space on the Chronicle server and on the file server.
- ☐ Maintain regular, rotating network backups that include Chronicle's backup folder, QuickBooks data folders, and any other key data. (However, do NOT directly back up from any hard drive on the Chronicle server; only back up from the backup folder Chronicle writes to your network. Please contact us if you have any questions about where to get the Chronicle data to back up.)
- ☐ Store copies of backups off-site.

General

- ☐ Check the firewall, making sure ports are closed except as needed for Chronicle and your other applications.
- ☐ Sweep and maintain spare filing.
- ☐ Make sure each computer has adequate memory, processor, hard drive space, etc., and suggest an upgrade plan to periodically replace obsolete machines.
- ☐ Make sure cables and switches are up to date and efficient.
- ☐ Organize all software by computer/user so you know what you have and so you can quickly find it if you need to reinstall any software.
- ☐ Arrange for someone to cover for you in case a network problem occurs when you are unavailable or away.
