## HISTORY

**Chief Complaint** — A maximally succinct statement of the patient:

- Age, handedness, gender
- **Problem and its duration**
- May include **major relevant risk factors** (if any), e.g. hypertension, coronary artery disease in a stroke patient.
- **Rarely** need to mention imaging if that was reason for the consult (not in every case)
- May specify who the historian was and quality of informant's history if different from usual
- E.g. 56 year old right-handed woman that presents with three days of garbled speech and right sided weakness with a history significant for high blood pressure, high cholesterol, and diabetes mellitus

**History of Present Illness** —

- **Briefly include usual state of health (baseline):** e.g. "normal, active, fully functional"; "residual mild right hemiparesis and can ambulate 50 feet with walker"; "at baseline, oriented to self, transfers by lift, and cannot recognize family members", etc.
- **Concisely and chronologically** describe symptoms which prompted medical attentions (**Timeline**)
- For each try to include as many details: **location, quality/severity, chronology (when it first began, mode of onset, mode of ending, duration, frequency), setting, aggravating and alleviating factors, treatment, associated symptoms, overall course, effect on normal activities, previous history of similar symptoms**
- Include pertinent negative symptoms that relate to differential diagnosis and localization
- **Pertinent past medical history and family history**
- **Put present symptoms in context of pre-existing chronic illness.** If the chronic illness is neurological, how it was diagnosed/confirmed
- **Hospital course: most relevant information** (vital signs, early exam, treatments, response to therapy, symptom evolution)
- Only include information that contributes in an important way to diagnosis or management. That includes labs or study results (only mention if they are critical to the HPI at this time).
- Differential diagnosis should be clear from the HPI.

**Past Medical History** — To include current, treated, and pertinent past medical conditions and surgeries (may optionally list surgical history as it's own category, especially if lengthy or complicated).

**Allergies and Adverse Reactions** — Should include both type of agent and reaction, severity, and whether dose dependent.

**Medications** — ideally includes name (generic or brand if pertinent), dosage, route of administration (default assumption is oral), frequency, and when started if relevant. Verify that medications correlate with past medical history problems.

**Family History** — There is *no* such thing as a noncontributory family history. If adopted with no knowledge of family, note here. Report presence or absence of neurologic diseases or
