productivity growth and job creation public sector decentralisation and pension system reform **Access to markets for smallholder farmers in Alto Molócue and Molumbo, Mozambique: Mid-term impact evaluation of INOVAGRO II**

Hosaena Ghebru, Jenny Smart, Tewodaj Mogues, 2019-10-22 The Innovation for Agribusiness InovAgro project which launched with its first three year phase in 2010 uses a market system development MSD approach towards the goal of increasing incomes of men and women small scale farmers in northern Mozambique InovAgro interventions promote improved agricultural productivity participation in selected high potential value chains and the development of inclusive and sustainable market systems such that impacts are expected to last long beyond the termination of the project This paper presents results from a midline quantitative impact evaluation of the second phase of the InovAgro project interventions 2014 2017 In it we use a carefully designed and executed quasi experimental study design to credibly attribute changes in market engagement and welfare of participating farmers to exposure to the InovAgro II project identifying and testing in what respects the intervention was most successful and what regard it had less impact Although InovAgro II projects operate in 11 districts of Zamb zia and Cabo Delgado provinces this impact evaluation focuses on two districts in Zamb zia province Alto Mol cue and Molumbo and in terms of value chains focuses on the soybean and pigeon pea high potential value chains while the InovAgro II project interventions focus on these in addition to maize sesame and groundnut A baseline survey was undertaken in 2015 covering the 2014 2015 agricultural season and a midline follow up survey was conducted in 2017 covering the 2016 2017 agricultural season and reaching 1 749 households of the original 1 886 households interviewed in the baseline survey Using difference in difference estimation and propensity score matching we find that exposure to the InovAgro II project is associated with an increase in the proportion of households selling soybean and pigeon pea by approximately 5% and 16% respectively significant at the 01 level Exposure to the InovAgro II project also results in significantly higher shares of smallholder farmers using improved seed for soybean and pigeon pea an increase of 6% for soybean and 2% for pigeon pea We find that the InovAgro II project is also associated with significant increases in access to agricultural output market information from formal sources 5% and hired labor for farming activities 8% Despite the significant impacts on short term outcome variables exposure to the InovAgro II project had limited impact on long term outcome variables such as on rural urban migration as well as engagement in the non farm sector two proxies for assessing potential welfare implications of the project however this finding is not surprising given the impact evaluation covers only two years a short period of time to bring about the long term impacts expected to eventually emanate from an MSD project

The Exceptional Case of Post-Bailout Portugal Elisabetta De Giorgi,José Santana-Pereira,2021-09-30 This book explores the argument that Portugal has been an exception to the trend of political upheaval and electoral instability across

Southern Europe following the financial crisis and the bailout period It does so by mapping and exploring in depth three key dimensions the governmental arena the party system and citizens political attitudes The five chapters in this edited volume show that a number of factors combine to make Portugal not only a very stimulating case study but also an exception within the South European panorama the stability of its party system and that of the mainstream parties electoral support in particular the quick recovery of political attitudes after the end of the bailout period 2011 2014 the absence of competitive populist challengers until 2019 despite high levels of populist attitudes amongst the citizenry the successful and stable union between anti austerity parties supporting the socialist government dubbed the Contraption and its adoption of an austerity by stealth model This book shows that it is possible to combine critical junctures and political stability responsiveness and responsibility through the study of one of the most intriguing cases in Southern Europe in the last decades The Exceptional Case of Post Bailout Portugal will be of interest to students researchers and scholars of Political Science and European Studies The chapters in this book were originally published as a special issue of the journal South European Society and Politics

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

The Convergence of K-12 and Higher Education Christopher P. Loss,Patrick J. McGuinn,2021-03-02 In *The Convergence of K 12 and Higher Education* two leading scholars of education policy bring together a distinguished and varied array of contributors to systematically examine the growing convergence between the K 12 and higher education sectors in the United States Though the two sectors have traditionally been treated as distinct and separate the editors show that the past decade has seen an increasing emphasis on the alignment between the two At the same time the national focus on outcomes and accountability originating in the K 12 sector is exerting growing pressure on higher education while trends toward privatization and diversification long characteristic of the postsecondary sector are influencing public schools This volume makes the powerful case that it is no longer possible to think of one sector in the absence of the other given the economic demographic and technological forces that are pushing the educational system toward convergence Taken together the chapters in this book provide a promising new line of inquiry for examining contemporary questions in education policy

World Economic Outlook, October 2016 International Monetary Fund. Research Dept., 2016-10-04 According to the October 2016 World Economic Outlook global growth is projected to slow to 3.1 percent in 2016 before recovering to 3.4 percent in 2017 The forecast revised down by 0.1 percentage point for 2016 and 2017 relative to April's report reflects a more subdued outlook for advanced economies following the June U.K. vote in favor of leaving the European Union Brexit and weaker than expected growth in the United States These developments have put further downward pressure on global interest rates as monetary policy is now expected to remain accommodative for longer Although the market reaction to the Brexit shock was reassuringly orderly the ultimate impact remains very unclear as the fate of institutional and trade arrangements between the United Kingdom and the European Union is uncertain Financial market sentiment toward emerging market economies has improved with expectations of lower interest rates in advanced economies reduced concern about China's near term prospects following policy support to growth and some firming of commodity prices But prospects differ sharply across countries and regions with emerging Asia in general and India in particular showing robust growth and sub-Saharan Africa experiencing a sharp slowdown In advanced economies a subdued outlook subject to sizable uncertainty and downside risks may fuel further political discontent with anti integration policy platforms gaining more traction Several emerging market and developing economies still face daunting policy challenges in adjusting to

weaker commodity prices These worrisome prospects make the need for a broad based policy response to raise growth and manage vulnerabilities more urgent than ever
