The book reflects on contextually relevant and responsive evidence-based perspectives grounded in an African context on preventive audiology in four major ear and hearing burdens of disease within the South African context: 1. early hearing detection and intervention, 2. middle ear pathologies, 3. ototoxicity, and 4. noise-induced hearing loss. The book represents innovative research seen from both a South African and global perspective. It offers new discourse and argues for a paradigm shift in how audiology is theorised and performed, particularly in low and middle income country contexts. The goal of this book is to motivate a paradigm shift in how the ear and hearing care is approached within this low and middle income country context while arguing for Afrocentric best practice evidence that leads to next practice.
