THE FIRST ROCKETS

Historians believe that the very first rockets were developed by the Chinese about a thousand years ago. The Chinese people used these rockets for celebrations, similar to today's fireworks. Eventually rockets started to be used as weapons by the British military. Robert Goddard was a scientist from America. He built a rocket in 1926. It was the first rocket fueled by liquid. This rocket did not go to space. In 1961, a Russian rocket took a human into space for the first time.

ROBERT GODDARD

Robert Goddard was born in 1882. He was an American scientist. He designed, built, and fired the first rocket that was fueled by liquid. In 1926, this rocket flew at 62 miles per hour and got to 84 feet high. Robert Goddard believed that a rocket could travel fast enough to reach the Moon. People made fun of him for this belief. Many of Robert's ideas are part of rocket science today. His nickname is "the father of space flight."
