and decreased unionization whilst also exploring changes in the evaluation of occupations and attitudes towards trade unions Drawing on distinctly sociological perspectives it shows how transformations in society and the labour market have affected conditions for individuals and considers whether these changes reinforce existing inequalities occasioned by polarisation or create new ones Scrutinising Polarisation considers whether and how the Swedish labour market has polarized and if so what this means for individual employees and labour organizations It will therefore appeal to scholars with interests in the sociology of work and professions social inequalities and labour market transformations The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Cartelisation, Convergence or Increasing Similarities? Henrik Enroth, Magnus Hagevi, 2018-03-02 It is often suggested that political parties are becoming increasingly alike and that party politics has turned into an elite affair where political professionals collude to further their self interest rather than work to represent the interests of their constituents In recent decades this diagnosis has been famously associated with Richard Katz and Peter Mair's cartel party theory Yet so far this controversial thesis has not been subjected to systematic empirical scrutiny nor has its conceptual and normative underpinnings been properly considered In this volume a group of political scientists with different specialisations take on this task focusing empirically on the Swedish party system which the originators of the cartel party theory have suggested is especially conducive to the formation of party cartels Collecting new and unique qualitative and quantitative data the volume casts serious doubt on the validity of the cartel party theory as an explanation for party system change

Party Realignment in Western Europe Hagevi, Magnus, Blombäck, Sofie, Demker, Marie, Hinnfors, Jonas, Loxbo, Karl, 2022-07-21 Identifying a crisis for representative democracy in Western European party systems this essential book studies the widening gap between political parties ideological economic Left Right rhetoric Combining in depth theoretical analysis with empirical research it addresses whether political party ideologies are converging or diverging and whether these changes are initiated by the parties themselves aligned with voter demand or forced by economic globalization

Employee Voice and Participation Jeff Hyman, 2018-06-13 Employee participation and voice EPV concern power and influence Traditionally EPV has encompassed worker attempts to wrest control from employers through radical societal transformation or to share control through collective regulation by trade unions This book offers a controversial alternative arguing that in recent years participation has shifted direction In *Employee Voice and Participation* the author contends that participation has moved away from employee attempts to secure autonomy and influence over organisational affairs to one in which management ideas and initiatives have taken centre stage This shift has been bolstered in the UK and USA by economic policies that treat regulation as an obstacle to competitive performance Through an examination of the development of ideas and practice surrounding employee voice and participation this volume tracks the story from the earliest attempts at securing worker control through to the rise of trade unions and today's managerial efforts to contain

union influence It also explores the negative consequences of these changes and though the outlook is pessimistic considers possible approaches to address the growing power imbalance between employers and workers Employee Voice and Participation will be an excellent supplementary text for advanced students of employment relations and Human Resource Management HRM It will also be a valuable read for researchers policy makers trade unions and HRM professionals

grown dramatically in recent years Much of this research has focused on the internal dynamics of desistance such as decision making choice and restraint Bringing together leading figures and drawing upon case studies from around the world this book seeks to fill a vacuum in the contemporary literature on desistance by considering processes and practices at a societal level that influence how and why people desist from crime Beginning with an outline of what is known about how social cultural and economic structures shape desistance from crime this book proceeds to explore studies of desistance in countries such as the UK Brazil France Israel Ireland Sweden and Chile These studies touch on variations by ethnicity the nature of the criminal justice system economic cycles gender religious belief systems and the use of time and space Policy matters relating to desistance such as the rehabilitation and supervision of former offenders are also explored This book will be invaluable reading to students and scholars of criminology sociology and social studies engaged in studies of desistance criminology criminal justice victimology penology and probation Learning Through Practice Stephen Billett,2010-06-02 Practice based learning the kind of education that comes from experiencing real work in real situations has always been a

prerequisite to qualification in professions such as medicine. However, there is growing interest in how practice-based models of learning can assist the initial preparation for and further development of skills for a wider range of occupations. Rather than being seen as a tool of first-time training, it is now viewed as a potentially important facet of professional development and life-long learning. This book provides perspectives on practice-based learning from a range of disciplines and fields of work. The collection here draws on a wide spectrum of perspectives to illustrate as well as to critically appraise approaches to practice-based learning. The book's two sections first explore the conceptual foundations of learning through practice and then provide detailed examples of its implementation. Long-standing practice-based approaches to learning have been used in many professions and trades. Indeed, admission to the trades and major professions, e.g. medicine, law, accountancy, can only be realised after completing extended periods of practice in authentic practice settings. However, the growing contemporary interest in using practice-based learning in more extensive contexts has arisen from concerns about the direct employability of graduates and the increasing focus on occupation-specific courses in both vocations and higher education. It is an especially urgent issue in an era of critical skill shortages, rapidly transforming work requirements, and an aging workforce combined with a looming shortage of new workforce entrants. We must better understand how existing models of practice-based learning are enacted in order to identify how they can be applied to different kinds of employment and workplaces. The contributions to this volume explore ways in which learning through practice can be conceptualised, enacted, and appraised through an analysis of the traditions, purposes, and processes that support this learning, including curriculum models and pedagogic practices.

Homely Atmospheres and Lighting Technologies in Denmark Mikkel Bille, 2020-05-26 Using case studies such as the use of candlelight and energy-saving lightbulbs in Denmark, this book unravels light's place at the heart of social life. In contrast to common perception of light as a technical and aesthetic phenomenon, Mikkel Bille argues that there is a cultural and social logic to lighting practices. By empirically investigating the social role of lighting in people's everyday lives, Mikkel Bille reveals how and why people visually shape their homes. Moving beyond the impact of its use, Bille also comments on the politics of lighting to examine how ideas of pollution and home act as barriers for technological fixes to curb energy demand. Attitudes to these issues are reflective of how human perceptions and practices are central to the efforts to cope with climate change. This ethnographic study is a must-read for students of anthropology, cultural studies, human geography, sociology, and design.

Integrating Gender Equality into Business and Management Education Patricia M. Flynn, Kathryn Haynes, Maureen A. Kilgour, 2017-09-08 This volume addresses the need to integrate gender equality into business and management education and provides examples of leading initiatives illustrating how this can occur from various disciplinary and global perspectives. Gender inequality has a long history in business schools and the workplace, and traditions are hard to change. Some disciplines remain resolutely gendered, affecting both women and men, and case materials on women leaders and managers are still rare. The chapters provide conceptual and research rationales as to why responsible

management education must address the issue of gender equality They also identify materials and resources to assist faculty in integrating gender issues and awareness into various disciplines and fields These include specific case studies and innovations that assess or address the role of gender in various educational environments The book is designed to help faculty integrate the topic of gender equality into their own teaching and research and gain support for the legitimacy of gender equality as an essential management education topic This is the first book in a series on gender equality as a challenge for business and management education published with the Principles of Responsible Management Education PRME Working Group on Gender Equality **The Global Politics of Artificial Intelligence** Maurizio

Tinnirello, 2022-04-24 Technologies such as artificial intelligence have led to significant advances in science and medicine but have also facilitated new forms of repression policing and surveillance AI policy has become without doubt a significant issue of global politics The Global Politics of Artificial Intelligence tackles some of the issues linked to AI development and use contributing to a better understanding of the global politics of AI This is an area where enormous work still needs to be done and the contributors to this volume provide significant input into this field of study to policy makers academics and society at large Each of the chapters in this volume works as freestanding contribution and provides an accessible account of a particular issue linked to AI from a political perspective Contributors to the volume come from many different areas of expertise and of the world and range from emergent to established authors Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
