This guide is written for field consultants, users, and administrators of the HP OpenView Network Node Manager (NNM) software product. It was written for those who seek a shortcut to commonly used product info that is either missing or obfuscated in the product docs, and it covers practical implementation information that can't be found in any product manuals or the product man-ref pages. This guide was gleaned from OpenView users and from the author's thirteen years of compiled notes on the product. The 2nd edition covers all 7.x features through 7.53 and features expanded and improved content totaling 353 pages. Note: This edition has a brief description of NNM 8i features but should NOT be purchased to help with NNM 8i installations. **Proceedings**, 2000 Moody's Manual of Investments John Sherman Porter, 1923. Goldberg, 1999-11-05. Environmentally safe engineering is one of the hottest and most controversial topics in technical circles. Though many publications offer theory and intellectual discussion of the topic, this book provides practical, hands-on advice, including hints and tips from the nation's top engineers. Green Electronics/Green Bottom Line offers practical advice for engineers and managers who want or need to incorporate environmental issues into the design process. The emerging discipline of Design for the Environment (DfE) combines engineering know-how with environmental awareness. Topics include international policy issues such as ISO 14000, materials selection (e.g., for recyclability), manufacturing concerns like no-flux processes, and design issues such as power consumption. Real-world cases show how these elements can be included in everyday designs. Each chapter opens with a topical cartoon and lively story, interview, or editorial. The discussion will then move to specific engineering issues and their

economic and social context The last section explores larger possibilities and new directions still to be explored by engineers concerned with education health and environmental quality Contributors include engineers from Motorola Analog Devices Dupont Compaq Nortel AMD and Apple Computer and academics from universities in the US Canada the UK and Europe as well as the Rocky Mountain Institute An everyday guide to environmentally sound electronics design Contributors include top engineers from the biggest electronics manufacturers and most prestigious universities Real world cases illustrate topics giving concepts the reader can apply immediately *Network World* ,1998-06-29 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce
