Deflecting Immigration Ivan Light, 2006-05-25 As international travel became cheaper and national economies grew more connected over the past thirty years millions of people from the Third World emigrated to richer countries A tenth of the population of Mexico relocated to the United States between 1980 and 2000 Globalization theorists claimed that reception cities could do nothing about this trend since nations make immigration policy not cities In Deflecting Immigration sociologist Ivan Light shows how Los Angeles reduced the sustained high volume influx of poor Latinos who settled there by deflecting a portion of the migration to other cities in the United States In this manner Los Angeles tamed globalization s local impact and helped to nationalize what had been a regional immigration issue Los Angeles deflected immigration elsewhere in two ways First the protracted network driven settlement of Mexicans naturally drove up rents in Mexican neighborhoods while reducing immigrants wages rendering Los Angeles a less attractive place to settle Second as migration outstripped the city s capacity to absorb newcomers Los Angeles gradually became poverty intolerant By enforcing existing industrial occupational and housing ordinances Los Angeles shut down some unwanted sweatshops and reduced slums Their loss reduced the metropolitan region s accessibility to poor immigrants without reducing its attractiveness to wealthier immigrants Additionally ordinances mandating that homes be built on minimum sized plots of land with attached garages made home ownership in L A s suburbs unaffordable for poor immigrants and prevented low cost rental housing from being built Local rules concerning home occupancy and yard maintenance also prevented poor immigrants from crowding together to share housing costs Unable to find affordable housing or low wage jobs approximately one million Latinos were deflected from Los Angeles between 1980 and 2000 The realities of a new global economy are still unfolding with uncertain consequences for the future of advanced societies but mass migration from the Third World is unlikely to stop in the next generation Deflecting Immigration offers a shrewd analysis of how America s largest immigrant destination independently managed the challenges posed by millions of poor immigrants and in the process helped focus attention on immigration as an issue of national importance

Schultz, 1996-10 The buildings and projects of Helmut C Schultz were the first in the 1970s to be defined by architectural critics as high tech In his introduction to the book Colin Davies writes British high tech is by definition an architecture of

light weight synthetic building materials metal glass and plastic Schulitz on the contrary relies on a broader palette Most of his buildings planned and built in California are wood constructions For Schulitz the soul of architecture lies to improve not only the product i e the completed building but also the individual production phases His designing methods are based on the following assumption if the construction process is simple logical efficient and also evident in the completed building then the work is worthy of building called architecture With this book Schulitz makes the case for the renewal of Modernism The publication shows the buildings and projects of his sixteen California years as well as those produced by his firm after his return to Germany His work shows astonishing continuity from the houses built in the tradition of Case Study Houses to the new large projects According to Davis these are buildings with breathtaking precision of details buildings which despite their severity and staidness do not yield to pomposity and monumentality Electrical Review and Western Electrician ,1910
