Biz-War and the Out-of-Power Elite Jarol B. Manheim, 2004-04-26 This book tells the fascinating story of the reemergence of the American political left over the last quarter century in the form of the new Progressive Movement Born out of Liberalism s crushing defeats at the hands of conservative strategists of the Reagan Bush era this new movement has cleverly reverse engineered the conservative s institutional networking strategy to plan and finance its resurgence Progressive strategists have constructed an elaborate network of foundations advocacy groups and other institutions to advance their agenda But where the conservatives relied on affirmative corporate support to help power their movement the Progressive Left has used an anti corporate strategy whose purpose is three fold 1 To reclaim the moral high ground of politics by challenging corporate power and influence 2 To gain effective control over other people s money e g pension funds mutual funds and use it to press for changes in corporate social policies 3 To leverage this influence over corporate decision making to change the direction of American politics and public policy *Biz War* extends the argument of Manheim s 2001 book *The Death of A Thousand Cuts* by showing how anti corporate campaigns have evolved from economically oriented labor actions to ideological and programmatic political struggles It details how the strategies and tactics crafted by organized labor are being employed with increasing effect by the political left The book will be of interest to students of contemporary American politics strategic communication political movements and business management Likewise it will help corporate executives and financial analysts understand more fully the proxy wars and other attacks against their companies

Network Science, A Decade Later Alan Feldman, Cliff Konold, Bob Coulter, Brian Conroy, 2000-01-12 *Network Science A Decade Later* the result of NSF funded research that looked at the experiences of a set of science projects which use the Internet offers an understanding of how the Internet can be used effectively by science teachers and students to support

inquiry based teaching and learning The book emphasizes theoretical and critical perspectives and is intended to raise questions about the goals of education and the ways that technology helps reach those goals and ways that it cannot The theoretical perspective of inquiry based teaching and learning in which the book is grounded is consistent with the current discipline based curriculum standards and frameworks The chapters in Part I State of the Art describe the history and current practice of network science Those in Part II Looking Deeply extend the inquiry into network science by examining discourse and data in depth using both empirical data and theoretical perspectives In Part III Looking Forward the authors step back from the issues of network science to take a broader view focusing on the question How should the Internet be used and not used to support student learning The book concludes with a reminder that technology will not replace teachers Rather the power of new technologies to give students both an overwhelming access to resources experts peers teachers texts images and data and the opportunity to pursue questions of their own design increases the need for highly skilled teachers and forward looking administrators This is a book for them and for all educators policymakers students involved in science and technology education For more information about the authors an archived discussions space a few chapters that can be downloaded as PDF files and ordering information visit teaparty.terc.edu/book
