

DDMF NoLimits Manual

Thank you for using DDMF NoLimits lookahead limiter! The interface has been designed such that most things are probably self-explanatory. Nevertheless we recommend to look at this manual at least once. ©

Installations:

NoLimits can be used with VST hosts under Windows and with VST and AU hosts under MacOSX (both Intel and PowerPCs, starting from MacOSX 10.4). To install the plugin on Windows, put the .dll-file into your VST plugins folder (e.g. C:/Program Files/Steinberg/VSTplugins). On MacOSX, the .component-directory has to go into the Audio Units folder (e.g. Library/Audio/Plugins/Components) and the .vst-directory into the VST folder (e.g. Library/Audio/Plugins/VST). If you only want to use one of the AU or VST version, only save the one you want to use.

Usage:

A limiter keeps the audio signal below a certain threshold by automatically bringing the level down when this threshold would be exceeded by your material. The nice thing is that you gain "headroom" that way: if you keep everything below, say, -3 dB, you can afterwards increase your overall level by 3 dB without going above 0 dB (which would cause digital clipping

craft Not just the act of crochet itself is manual but also the process of creating instructions for new crochet patterns which is barely supported by domain specific digital solutions This leads to unstructured and often also ambiguous and erroneous pattern instructions In this report we propose a concept to digitally represent crochet patterns This format incorporates crochet techniques which allows domain specific support for crochet pattern designers during the pattern creation and instruction writing process As contributions we present a thorough domain analysis the concept of a graph structure used as domain specific language to specify crochet patterns and a prototype of a projectional editor using the graph as representation format of patterns and a diagramming system to visualize them in 2D and 3D By analyzing the domain we learned about crochet techniques and pain points of designers in their pattern creation workflow These insights are the basis on which we defined the pattern representation In order to evaluate our concept we built a prototype by which the feasibility of the concept is shown and we tested the software with professional crochet designers who approved of the concept
