The American Enemy Philippe Roger, 2006-11 Georges Louis Buffon an eighteenth century French scientist was the first to promote the widespread idea that nature in the New World was deficient in America which he had never visited dogs don't bark birds don't sing and by extension humans are weaker less intelligent and less potent Thomas Jefferson infuriated by these claims brought a seven foot tall carcass of a moose from America to the entry hall of his Parisian hotel but the five foot tall Buffon remained unimpressed and refused to change his views on America's inferiority Buffon as Philippe Roger demonstrates here was just one of the first in a long line of Frenchmen who have built a history of anti Americanism in that country a progressive history that is alternately ludicrous and trenchant *The American Enemy* is Roger's bestselling and widely acclaimed history of French anti Americanism presented here in English translation for the first time With elegance and good humor Roger goes back 200 years to unearth the deep roots of this anti Americanism and trace its changing nature from the belittling as Buffon did of the savage American to France's resigned dependency on America for goods and commerce and finally to the fear of America's global domination in light of France's thwarted imperial ambitions Roger sees French anti Americanism as barely acquainted with actual fact rather anti Americanism is a cultural pillar for the French America an idea that the country and its culture have long defined themselves against Sharon Bowman's fine translation of this magisterial work brings French anti Americanism into the broad light of day offering fascinating reading for Americans who care about our image abroad and how it came about Mr Roger almost single handedly creates a new field of study tracing the nuances and imagery of anti Americanism in France over 250 years He shows that far from being a specific reaction to recent American policies it has been knit into the very substance of French intellectual and cultural life His book stuns with its accumulated detail and analysis Edward Rothstein New York Times A brilliant and exhaustive guide to the history of French Ameriphobia Simon Schama New Yorker Bulletin, 1895 **Albert Camus's "The New Mediterranean Culture"** Neil Foxlee, 2010 This book was shortlisted for the R H Gapper prize 2011 On 8 February 1937 the 23 year old Albert Camus gave an inaugural lecture for a new Maison de la culture or community arts centre in Algiers Entitled La nouvelle culture méditerranéenne The New Mediterranean Culture Camus's lecture has been interpreted in radically different ways while some critics have dismissed it as an incoherent piece of juvenilia others see it as key to understanding his future development as a thinker whether as the first expression of his so called Mediterranean humanism or as an early indication of what is seen as his essentially colonial mentality These various interpretations are based on reading the text of *The New Mediterranean Culture* in a single context whether that of Camus's life and work as a whole of French discourses on the Mediterranean or of colonial Algeria and French discourses on that country By contrast this study argues that Camus's lecture and in principle any historical text needs to be seen in a multiplicity of contexts discursive and otherwise if readers are to understand properly what its author was doing in writing it Using Camus's lecture as a case study the book provides a detailed theoretical and practical justification of this multi contextualist approach Study of the
