Hook: pink

Background: orange

Counter-claim: yellow

Thesis: green

Snorkeling in the ocean can be an exhilarating experience, until one begins to question what might be lurking down below. The fear of sharks can seriously impact an enjoyable day swimming in the sea. Recently, scientists at a company called *Shark Defense* started testing various ways to keep sharks away from humans. They've found that the smell of rotting sharks may actually keep live sharks away, so they made a chemical that smells like dead and rotting sharks. Scientists believe this chemical might be able to repel sharks. Some may believe this is a great idea since people will be able to enjoy time in the water without worrying about shark attacks. However, creating chemicals to release in the ocean is dangerous because they may harm the environment, they could be harmful to people and they can create a false sense of safety.
