Taming China's Wilderness Patrick Fuliang Shan,2016-04-01 Until the beginning of the twentieth century the Chinese province of Heilongjiang historically known as Northern Manchuria remained a sparsely populated territory on

the northeastern frontier For about two centuries the rulers of the Qing dynasty 1644 1912 whose historical homeland was in Manchuria enforced a policy that prohibited Chinese immigration and settlement and maintained the region's reputation as the Great Northern Wilderness Yet as this new study demonstrates by the early 20th century the Chinese government reversed its previous policy and began to encourage immigration into Heilongjiang turning a backwater into a thriving frontier region Covering the period between the reversal of the anti immigration policy around 1900 and the Japanese occupation of Heilongjiang in 1931 this book investigates this distinctive frontier and the impact upon it of the settlement of four million Chinese settlers during a thirty one year period Following an introduction providing a background to the period covered the study is divided into five chapters The first chapter looks at patterns of immigration settlement and the features of the newly developing frontier society Chapter two then deals with land possession tenure and relations amongst the newly arrived settlers The third chapter discusses the transformation of the ethnic make up of the region and the move from a largely nomadic culture to one of settled farmers Chapter four probes the social problems these changes caused particularly banditry The final chapter revises commonly held notions about Russian dominance of the region arguing that Russia's influence was limited to the railway zone Taken together these chapters not only provide an overview of a territory undergoing rapid and sustained change but also provide insights into wider Chinese history as well as adding to the on going scholarly interest in border and frontier studies
