

## What is Task Cycle and How to View in Orangescrum?

Time metrics are a set of performance indicators used to measure and evaluate the efficiency and effectiveness of an organization's time management. These metrics are crucial in providing insights into how much time is being spent on particular activities and projects, and how efficiently this time is being utilized.

Effective time management is a critical component of achieving organizational success, and time metrics can help identify areas where time is being wasted or not being used to its full potential. By tracking time metrics, organizations can improve their productivity, reduce costs, and optimize their resources.

Some common time metrics include cycle time, lead time, task duration, time to market, and time to resolution. Each of these metrics has its unique purpose and can help organizations measure different aspects of their operations.

Overall, time metrics are essential tools that can help organizations improve their time management practices and achieve their strategic goals. By tracking and analyzing these metrics regularly, organizations can identify areas for improvement and make data-driven decisions to optimize their time management practices.

There are several types of time metrics used in project management, and some of the most common ones are:

**Task Cycle:** The amount of time it takes to complete a single cycle of a specific task or process, from start to finish including the time it took in each status or stages of project development. It is used to identify bottlenecks and optimize processes to reduce cycle time.

**Lead Time:** The time it takes to complete a task or project from the moment it is requested to the moment it is delivered. It measures the entire time required to complete a task, including any waiting time.

**Task Duration:** The time it takes to complete a specific task, from start to finish. This metric is used to monitor task progress and identify potential delays.

**Time to Market:** The amount of time it takes to bring a product or service to the market, from idea generation to launch. It measures the efficiency of the product development process.

**Time to Resolution:** The time it takes to resolve a problem or issue, from the moment it is reported to the moment it is resolved. It is used to monitor service levels and identify areas for improvement.
