

Perceptual Study Guide

Answer every question in a complete sentence and highlight 3 key concepts in blue

1) How Method?

1. What methodological problems could be expected if you did observational research without first plan and control the use of the participant's memory?
This research design is a naturalistic observation, in which there are no possible control over what the observer sees or what the participant does.
2. How does knowing the intent of the study affect what subjects do during the experiment?
In naturalistic observation, the researcher is not manipulating.
3. How can you tell whether the study is a naturalistic observation or a controlled experiment?
Naturalistic observation is without human control. They are not manipulated or assigned to any group. They are observed in their natural environment and the researcher is not manipulating anything.
4. What methodological problems could be expected if you did not control the use of the participant's memory?
The first issue is the reliability of the data. Without control, the data is not reliable.
5. What methodological problems could be expected if you did not control the use of the participant's memory?
The second issue is the validity of the data. Without control, the data is not valid.
6. What methodological problems could be expected if you did not control the use of the participant's memory?
The third issue is the generalizability of the data. Without control, the data is not generalizable.
7. What methodological problems could be expected if you did not control the use of the participant's memory?
The fourth issue is the ethicality of the data. Without control, the data is not ethical.

2) How Experiment?

8. How does knowing the intent of the study affect what subjects do during the experiment?
The first issue is the reliability of the data. Without control, the data is not reliable.
9. How does knowing the intent of the study affect what subjects do during the experiment?
The second issue is the validity of the data. Without control, the data is not valid.
10. How does knowing the intent of the study affect what subjects do during the experiment?
The third issue is the generalizability of the data. Without control, the data is not generalizable.
11. How does knowing the intent of the study affect what subjects do during the experiment?
The fourth issue is the ethicality of the data. Without control, the data is not ethical.
