Political Parties, Business Groups, and Corruption in Developing Countries Vineeta Yadav, 2011-04-13 In *Political Parties Business Groups and Corruption in Developing Countries* Vineeta Yadav tackles the puzzle of corruption by analyzing the role that business lobbying plays in it Combining focused studies of legislative institutions and business groups in India and Brazil with a broader survey of corruption in sixty four developing democracies Yadav shows how systems with powerful parties rather than ones with powerful individual legislators encourage the most corruption A rigorous comparative examination of the connections between political institutions lobbying and corruption this work will reshape our understanding of how developing democracies can both discourage and encourage bribery vote buying and influence peddling

Political Parties and Interest Groups in Norway Elin Haugsgjerd Allern, 2024-10-31 How do today s political parties relate to other organisations Do they prefer rather distant relationships with a wide range of interest groups or have they virtually detached themselves from civil society altogether Scholars seem to agree that traditionally close relationships such as those between social democratic parties and trade unions have grown weaker since the 1960s But to date only limited systematic research has been conducted While parties and interest groups attract a great deal of attention from political scientists the links between them have been largely overlooked This book is an attempt to bridge the gap starting from the party side of the relationship It throws new light on the topic by presenting a theory driven comprehensive study of Norway s seven major political parties and their relationships with interest groups at the beginning of the new millennium Based on original and extensive data including party documents in depth interviews with key players and a survey of national party elites Elin Haugsgjerd Allern paints a nuanced picture of the nature and significance of these relationships and the factors that shape them A major conclusion is that Norway s parties tend to maintain rather distant but wide ranging relationships with interest groups today However some parties still have fairly strong links with their traditional associates and a narrower network of links with other groups Hence Allern also shows that significant differences exist between parties that are apparently exposed to the same social political and institutional environment

Organizing for Policy Influence Benjamin Farrer, 2017-08-09 In this book Benjamin Farrer explains how activists can influence the policies they care about even when they are outnumbered and their issues are ignored The solution lies in a surprising place organizational choice Different types of organizations will be more influential under particular democratic institutions If they choose the optimal type of organization given their

institutional context then even minority groups can be influential Environmentalists are a key example of how small groups can sometimes punch above their weight Environmentalists in different countries have made different organizational choices These choices explain whether or not they succeeded in influencing policy In the empirical chapters that follow Farrer shows that environmentalists can sometimes be more influential if they form interest groups but under other institutions political parties are the optimal organizational choice Although interest groups are often easier to create national institutions can sometimes insulate mainstream politicians from niche interest groups When institutions deny access to interest groups activists are forced to send the stronger signal of party entry Using a variety of methods including a formal model an experiment and a wealth of empirical data from a variety of settings Farrer proves that this theory of organizational choice adds to our understanding of several crucial phenomena First it helps explain patterns of political participation by showing the importance of instrumental rather than purely expressive motivations for activism Second it provides an important modification to Duverger's 1954 law by showing that new party entry is a function not only of electoral rules but also of the rules that govern interest groups Third it extends research on the role of institutions in determining policy outputs by showing that policy outcomes are a function of the interaction between organizational choices and institutional context

Resources in Education, 1997 The Dilemma of Compliance Svitlana Chernykh, 2024-12-17 Over the past twenty years the causes and consequences of post election disputes have become one of the most compelling topics of research in political science Between 2012 and 2022 political parties challenged the results of more than 25 percent of elections When democratic transitions are dependent on the willingness of participants to accept defeat political parties can undermine election based democracy by rejecting the outcome As the world enters the fourth decade since the start of the third wave of democratization the question of whether election losers will comply or reject election outcomes is more and more pressing The Dilemma of Compliance analyzes this phenomenon at the level of political parties raising three important questions Why do some political parties refuse to comply with election results What determines the strategies they use to contest the outcomes What consequences do post election disputes have for the political parties that initiate them To answer these questions this book draws on an original dataset of post election responses encompassing over 300 political parties which participated in 270 elections held in twenty two countries of Eastern Europe and the former Soviet Union over a period of more than two decades In doing so it offers a new theoretical framework for studying electoral compliance in comparative perspective and advances research on democratic transition democracy promotion post election protests and party politics

EPIE Materials Report, 1978 Democratic Justice and the Social Contract Albert Weale, 2013-08-15 The book offers a novel and original synthesis of work in modern political theory and in political science and political economy to offer a theory of democratic justice considering society as a social contract **The Commander-in-Chief Test** Jeffrey A.

Friedman, 2023-12-15 In The Commander in Chief Test Jeffrey A Friedman offers a fresh explanation for why Americans are

often frustrated by the cost and scope of US foreign policy and how we can fix that for the future Americans frequently criticize US foreign policy for being overly costly and excessively militaristic With its rising defense budgets and open ended forever wars US foreign policy often appears disconnected from public opinion reflecting the views of elites and special interests rather than the attitudes of ordinary citizens The Commander in Chief Test argues that this conventional wisdom underestimates the role public opinion plays in shaping foreign policy Voters may prefer to elect leaders who share their policy views but they prioritize selecting presidents who seem to have the right personal attributes to be an effective commander in chief Leaders then use hawkish foreign policies as tools for showing that they are tough enough to defend America s interests on the international stage This link between leaders policy positions and their personal images steers US foreign policy in directions that are more hawkish than what voters actually want Combining polling data with survey experiments and original archival research on cases from the Vietnam War through the occupations of Iraq and Afghanistan Friedman demonstrates that public opinion plays a surprisingly extensive and often problematic role in shaping US international behavior With the commander in chief test a perennial point of debate in national elections Friedman s insights offer important lessons on how the politics of image making impacts foreign policy and how the public should choose its president
