Scalable and Efficient Probabilistic Topic Model Inference for

Textual Data Måns Magnusson, 2018-04-27 Probabilistic topic models have proven to be an extremely versatile class of mixed membership models for discovering the thematic structure of text collections. There are many possible applications covering a broad range of areas of study: technology, natural science, social science, and the humanities. In this thesis, a new efficient parallel Markov Chain Monte Carlo inference algorithm is proposed for Bayesian inference in large topic models. The proposed methods scale well with the corpus size and can be used for other probabilistic topic models and other natural language processing applications. The proposed methods are fast, efficient, scalable, and will converge to the true posterior distribution. In addition, in this thesis, a supervised topic model for high-dimensional text classification is also proposed, with emphasis on interpretable document prediction using the horseshoe shrinkage prior in supervised topic models. Finally, we develop a model and inference algorithm that can model agenda and framing of political speeches over time with a priori defined topics. We apply the approach to analyze the evolution of immigration discourse in the Swedish parliament by combining theory from political science and communication science with a probabilistic topic model.

Probabilistiska mnesmodeller: topic models är en mångsidig klass av modeller för att estimerasammansättningar i stora corpusar. Applikationer finns i ett flertal vetenskapsområden som teknik, naturvetenskap, samhällsvetenskap och humaniora. I denna avhandling föreslås nya effektiva och parallella Markov Chain Monte Carlo-algoritmer för Bayesianska mnesmodeller. De föreslagna metoderna skalar väl med storleken på corpuset och kan användas för flera olika mnesmodeller och liknande modeller inom språkteknologi. De föreslagna metoderna är snabba, effektiva, skalbara och konvergerar till den sanna posteriorfördelningen. Dessutom föreslås en mnesmodell för högdimensionell textklassificering med tonvikt på tolkningsbar dokumentklassificering genom att använda en kraftigt regulariserande priorfördelningar. Slutligen utvecklas en mnesmodell för att analysera agenda och framing för ett förutbestämt ämne. Med denna metod analyserar vi invandringsdiskursen i Sveriges Riksdag över tid genom att kombinera teori från statsvetenskap, kommunikationsvetenskap och probabilistiska mnesmodeller.

The "I Hate to Write" Guide to College Level Essays Beth Daniels, 2017-12-29 THE I HATE TO WRITE GUIDE TO COLLEGE LEVEL ESSAYS 4 IN 1 does not replace the required text books in English Composition courses but it does explain how to write an essay at this level without using academic words like thesis. I never understood what that meant when I was an undergraduate so I don't expect everyone to know what it means but I do explain what it is in regular language. The four volumes grouped together here have appeared in e-book form but never as a print copy. It was probably past time to offer another option. The reason I wrote BASIC ESSAY BOOK CRITIQUE and RESEARCH PAPER is that they were the first essays students were required to write not just in composition class but in other courses. CHOOSING A TOPIC is something that has boggled many a mind. These are my guidelines and enough students told me that the way I detailed essay requirements finally allowed the light bulb moment of understanding the process to be lit for them. Hopefully you'll find something helpful too.
