Railway Development Impacts On Urban Dynamics:

Railway Development Frank Bruinsma, Eric Pels, Hugo Priemus, Piet Rietveld, Bert van Wee, 2007-12-22 The revitalisation of railway station areas has been a hot issue in policy making in Europe in recent years The introduction of two new railway systems the high speed train and light rail systems has pushed forward the redevelopment of not only railway stations themselves but also of their in many cases deteriorated direct surroundings Examples of revitalisation of railway station areas can be found throughout Europe for example in countries like England Liverpool France Euralille Germany Berlin and the Netherlands Amsterdam South Axis The dynamics of revitalisation of railway station areas can best be understood by combining the sights of several disciplines economics and spatial sciences being the most important disciplines This book therefore addresses the subject from a multi disciplinary perspective Railway station area redevelopment projects try to cope with the creased lack of interoperability and interconnectivity between infrastructures and boost the local regional economy by creating a new high quality multifunctional urban landscape at the same time At present the initial outcomes with the transformation of deteriorated railway station areas into modern mixed office shopping and residential areas stems hopeful but what are the prospects of those redeveloped areas Most of the papers contained in this volume were presented at the 5th special session Railway stations and urban dynamics of the 45 conference of the European Regional Science Association ERSA held in Amsterdam the Netherlands during August 2005 **Proceedings of the 21st International Symposium on Advancement of Construction Management and Real Estate** K. W. Chau, Isabelle Y.S. Chan, Weisheng Lu, Chris Webster, 2017-12-18 This book presents the proceedings of CRIOCM_2016 21st International Conference on Advancement of Construction Management and Real Estate sharing the latest developments in real estate and construction management around the globe The conference was organized by the Chinese Research Institute of Construction Management CRIOCM working in close collaboration with the University of Hong Kong Written by international academics and professionals the proceedings discuss the latest achievements research findings and advances in frontier disciplines in the field of construction management and real estate Covering a wide range of topics including building information modelling big data geographic information systems housing policies management of infrastructure projects occupational health and safety real estate finance and economics urban planning and sustainability the discussions provide valuable insights into the implementation of advanced construction project management and the real estate market in China and abroad The book is an outstanding reference resource for academics and professionals alike **High-Speed Railways and New Structure of Socio-economic Development in China** Xiaoyan Lin, 2023-06-14 This book systematically expounds the significance of the high speed railway in China's regional economic and social development It also contains a large number of case discussions so that readers can fully understand the development of China's high speed railway and its role in promoting China's economy The purpose of this book is to determine whether high speed railway has important political and

strategic significance for China's development the inherent relationship and mechanism of the high speed railway together with economic and social development and how to achieve the high speed rail and economic and social coordination as well as sustainable development

Spatial Implications and Planning Criteria for High-Speed Rail Cities and Regions José Maria de Ureña, Chia-Lin Chen, Anastasia Loukaitou-Sideris, Roger Vickerman, 2021-03-29 *Spatial Implications and Planning Criteria for High speed Rail Cities and Regions* evaluates the varied experiences that HSR systems have brought about to different station cities and their regional territories around the world with an eye towards better future planning and policy of such systems This edited volume draws from examples of high speed rail operations in different cities in Europe and Asia to depict the various impacts of this major transportation infrastructure It attempts to distinguish the short and long term impacts described in the literature classifying them into regional and inter urban effects urban effects and wider economic impacts Planning challenges appear at two major points 1 during the initial planning stage that includes the route and location of stations and 2 during the development process that follows The case studies in the book concentrate on a variety of topics from the impact of high speed rail on population growth in some station cities to the regional economic impacts that an HSR system can bring about to the larger territories it passes through to the potential of station cities to better attract firms or to experience increases in tourism and commerce They also assess planning strategies and experiences from station cities to draw lessons for future HSR planning policies The Chapters in this book were originally published in a special issue of *European Planning Studies*

Territorial Implications of High Speed Rail José M. de Ureña, 2016-04-01 High Speed Rail's HSR main objective is to attract air passengers between big metropolitan areas however the main territorial implications in many cases occur not in these metropolitan areas but in the intermediate cities These implications open up new spatial planning possibilities such as decentralization new regional centres and urban renewal projects This book presents the experience of 20 years of HSR in Spain including some explicit information arguments and conclusions derived from HSR in other European Countries It debates the HSR territorial implications at three scales national regional and local thus being of interest for strategic debates at those scales such as the decision of new national lines the pros and cons of deviating the line to reach minor intermediate cities or the selection of precise locations for new stations and the development projects in their surroundings Comparisons with the recent changes in accessibility spatial distribution of population and activities are made with mobility for working purposes and with the characteristics of the HSR passengers This book also examines the actions strategies and urban projects that medium size cities can use to make best use of HSR opportunities synthesising the experience of HSR medium cities in Spain and Europe The book's conclusions will be of interest over and above scholars to transport infrastructure decision makers city and regional planners and managers and transport companies
