

Sloths

Sloths are a medium-sized mammals. There are two-toed sloths and the three-toed sloth. They are classified into six different species.

Appearance

- The two species are quite similar in appearance.
- Roundish head, tiny ears, sad look-eyes, shaggy tails.

Diet

Sloth mainly eat the tree buds, new shoots, fruit and leaves of Cecropia tree. Some two-toed sloths also eat insects, small reptiles and birds.

Fascinating Fact

The sloth has one of the smallest mammal brains - about the size of a small marble.

Location

Sloths are trees-dwelling animals. They are found in the jungles of Central and South America.

Enemies

Sloths usually only leave the tree to go to the toilet once a week on the ground. This is when they are most vulnerable to being attacked by their main predators such as jaguars, the harpy eagle and snakes.

Fun Facts

Their fur is around the same colour as trees where they live. It used to be thought sloths slept for 15 to 20 hours a day. However it's now believed they only sleep around 10 hours a day.
