Gardener's Guide to Tropical Plants Nellie Neal,2012-08-15 Now gardeners can bring an exotic flair to their gardens by introducing the color textures and fabulous foliage of tropical plants Not just for hot climates anymore bromeliads orchids bananas palms birds of paradise elephant ears canna and more can bring a touch of the tropics to any garden Gardener s can choose from more than 150 plants featured in this book each chosen for the visual impact it adds to any landscape or container garden Plants are organized by a range of clearly defined zones making it easy for gardeners to find the plants that will succeed in their landscape Author Nellie Neal explains how to best use tropical plants both indoors and out To make this book a universally useful guide it is organized to explain how to grow tropical plants in a wide range of clearly defined zones Further the book illustrates how to best use these plants in landscapes and containers indoors and out no matter where you live It is a practical user friendly celebration of tropical plants Translating Indigenous Knowledges Ma Carmen África Vidal Claramonte,2024-12-30 In this book Vidal presents a new way of translating indigenous epistemologies For centuries the Western world has ordained what knowledge is and what it should be and has also been responsible for transmitting that knowledge This universal knowledge has traveled to the four corners of the globe In recent decades there has been a steadily growing interest in dialogical epistemologies Disciplines ranging from historiography and philosophy to anthropology are calling for this universalist idea of knowledge to be modified Thanks to this change of perspective other forms of knowledge which until now have been ignored are gradually coming to light Indigenous knowledges are not constructed with the scientific binary static Cartesian or univocal logic characteristic of Western societies Non Western types of knowledge incorporate senses emotions body objects and matter It is impossible to reduce indigenous knowledges to Western conceptualizations The types of translation covered in this book assume that knowledge is not transmitted only in the Western way and that there are world views that take into account the emotions and body as well as the intellect This includes all types of beings human non human and extrahuman In the face of this plurality of epistemologies this book affirms that the static Western conceptual traditions characterized by a binary logic are not useful and that there is a need to

translate outside the scope of these traditions The examples given in this book show that translation is not only a process involving Western and non Western languages Translation is not a mere substitution of one word for another because knowledge is not only transmitted through words It also involves non verbal elements Knowledge is transmitted through objects songs sensations and emotions as well as through words Moreover many non Western traditions do not translate with language systems but rather with other semiotic systems such as knots threads colors and bodies in movement This is a timely topical and transdisciplinary reading of interest to advanced students and researchers in translation studies anthropology and beyond
