The end of the experiment? Mick Moran,Andrew Bowman,Julie Froud,Sukhdev Johal,John Law,Adam Leaver,Karel Williams,2014-05-31 For thirty years the British economy has repeated the same old experiment of subjecting everything to competition and market because that is what works in the imagination of central government This book demonstrates the repeated failure of that experiment by detailed examination of three sectors broadband food supply and retail banking The book argues for a new experiment in social licensing whereby the right to trade in foundational activities would be dependent on the discharge of social obligations in the form of sourcing training and living wages Written by a team of researchers and policy advocates based at the Centre for Research on Socio Cultural Change this book combines rigour and readability and will be relevant to practitioners policy makers academics and engaged citizens

Planning and Design for Sustainable Urban Mobility Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public

transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change
