Toolkit for Counseling Spanish-Speaking Clients Lorraine T. Benuto, 2017-11-14 This timely practical reference addresses the lack of Spanish language resources for mental health professionals to use with their Latino clients. Geared toward both English and Spanish speaking practitioners in a variety of settings, this volume is designed to minimize misunderstandings between the clinician and client and with that the possibility of inaccurate diagnosis and or ineffective treatment. Coverage for each topic features a discussion of cultural considerations, guidelines for evidence based best practices, a review of available findings, a treatment plan, plus clinical tools and client handouts, homework sheets, worksheets and other materials. Chapters span a wide range of disorders and problems over the life course and include reproducible resources for: Assessing for race based trauma; Using behavioral activation and cognitive interventions to treat depression among Latinos; Treating aggression, substance use, abuse and dependence among Latino Adults; Treating behavioral problems among Latino adolescents; Treating anxiety among Latino children; Working with Latino couples; Restoring legal competency with Latinos. The Toolkit for Counseling Spanish Speaking Clients fills a glaring need in behavioral service delivery, offering health psychologists, social workers, clinical psychologists, neuropsychologists and other helping professionals culturally relevant support for working with this underserved population. The materials included here are an important step toward dismantling barriers to mental health care.

Case-Based Learning for Group Intervention in Social Work Jacqueline Corcoran, 2020 Case Based Learning for Group Intervention in Social Work provides essential information on planning and facilitating groups in a clear and easy to understand format. To develop student competency, the volume uses a contemporary pedagogy: case based learning as a teaching tool for analysis, application and decision making. By working through cases, students gain exposure to the considerable range of populations that can be served by social work group intervention.

Les troubles liés aux événements traumatiques. Guide des meilleures pratiques pour une clientèle complexe Suzie Bond, 2019-04-23T00:00:00-04:00 Au Canada, la majorité (76 %) de la population vivra un événement traumatique au cours de sa vie. Même si la plupart des personnes arrivent à s'adapter, un tel événement provoque chez 10 % d'elles le développement d'un trouble de stress post-traumatique (TSPT). Ce nombre peut tripler voire quadrupler dans les populations à plus haut risque, comme les militaires, les victimes d'agressions sexuelles et les individus gravement blessés. Outre le TSPT, plusieurs troubles peuvent apparaître à la suite d'un trauma, soit une humeur dépressive, de l'insomnie et des cauchemars, une consommation inappropriée d'alcool ou de drogue, pour ne nommer que ceux-ci. En somme, les cliniciens sont souvent démunis face à cette clientèle des plus complexes. Cet ouvrage est le premier en français à présenter les meilleures pratiques dans l'évaluation et le traitement du TSPT et des troubles connexes, dans un langage accessible aux cliniciens. Ancrage rigoureusement scientifique et dans la pratique clinique, il se veut un exercice de transfert de connaissances de la recherche vers la clinique. Ainsi, il aidera les cliniciens choisir le traitement le plus approprié pour leur patient et leur apportera les outils et les ressources nécessaires pour

mettre les recommandations en pratique Il pourra aussi être utilisé auprès des futurs intervenants afin de parfaire leur formation concernant l'évaluation et l'intervention auprès des victimes de trauma
