Development with the Force.com Platform Jason Ouellette, 2009-10-06 Foreword by Craig Weissman CTO Salesforce com Build Cloud Based Enterprise Applications Fast and Drive More Value at Lower Cost Using the Force com platform enterprise developers can build and deploy powerful applications far more rapidly than traditional J2EE Microsoft NET or LAMP technology stacks permit With a free subscription to the Force com platform developers can build apps that solve virtually any enterprise challenge with remarkable value scalability and reliability This is the first book that brings

together all the practical technical guidance you need to make the most of Force.com in your own custom enterprise applications. Leading Force.com developer Jason Ouellette helps you identify suitable uses for Force.com and provides all the insights and sample code needed to rapidly prototype, deploy, and integrate with production quality Force.com applications. Ouellette provides realistic code examples at every step, emphasizing maintainability, flexibility, and interoperability throughout. Writing for developers, architects, and analysts, he shows how to create custom enterprise apps on Force.com in days or weeks, not months or years. Leverage Force.com's extensive capabilities for storing, managing, and securing data. Quickly create sophisticated business logic with the Apex programming language. Use Visualforce to construct custom user interfaces. Establish automated or semiautomated workflows. Implement Ajax behaviors without writing JavaScript code or learning new JavaScript libraries. Integrate Force.com-based data and processes with other applications inside and outside the platform. Display reports as state-of-the-art dashboards. Integrate Force.com applications with existing Single Sign-On systems. The Leadership-Driven Method (LDM) to Performance Measurement Bryan Shane, Patricia Lafferty, 2021-11-18. In so many cases, senior public servants are forced to make decisions with incomplete, inaccurate, and untimely information. Without effective information, ships of state are sailing blind. MORE THAN JUST THEORY: The Leadership-Driven Method (LDM) to Performance Measurement is a must-read for senior and mid-level managers who are charged with making informed decisions that are needed to ensure that their public sector or not-for-profit organization meets its strategic goals. Filled with ready-to-use diagnostic tools or Windows, a step-by-step methodology, and case studies, this book provides both the art and the science to successfully develop and/or improve a Performance Measurement system. The science lies in the application of the methodology, the tools, and their analysis. The art is found in adapting and implementing the PM system to the unique requirements of each organization in terms of resources, timing, security, climate, planning, and governance requirements. The three case studies on Major Projects, Procurement, and Training further demonstrate the effective application of the LDM. Use of the LDM can result in improved service and client satisfaction, increased efficiencies, and cost savings, elimination of duplication of effort, and increased productivity and enhanced staff morale, together with the successful introduction of best practices. The tools and techniques within this book have been validated through 30 years of successful professional use by the authors in their own consulting practice.

Managing Construction Technology Kurt Maldovan, Chitwan Saluja, Vincent Testa, Brian Tracy, Marty Turner, 2025-05-30. Maximizes construction success with practical guidance on managing emerging technologies in the AEC industry. In a rapidly evolving industry, effective management of construction technology is no longer optional; it is essential. *Managing Construction Technology: People, Process, and Product* delivers the insights and frameworks necessary to navigate the complex landscape of digital innovation in the architecture, engineering, and construction (AEC) fields. Emphasizing the need

for a holistic approach that focuses on process improvements alongside technology deployment the book guides readers through evaluating implementing and optimizing both existing and emerging technologies including BIM VDC robotics and AR VR Written by a team of experienced industry professionals Managing Construction Technology offers actionable strategies to enhance efficiency productivity and sustained success Step by step the authors equip AEC stakeholders with tools to assess the cost benefit balance of technology investments craft systems for ongoing evaluation and foster collaboration across project teams Throughout the book detailed management principles and diverse case studies help readers gain a comprehensive understanding of digital transformation tailored to various project types and organizational structures Providing a detailed blueprint for embracing technological innovation Managing Construction Technology Presents a proven methodology for evaluating and implementing cutting edge technologies in the AEC industry Includes real world examples showcasing successful digital technology applications across diverse project types and scales Features management principles designed to maximize ROI and streamline decision making processes for technology investments Addresses critical topics such as cost benefit analysis stakeholder collaboration and long term infrastructure planning Highlights long term developments and trends shaping the future of digital construction Managing Construction Technology People Process and Product is ideal for advanced undergraduate and graduate students in construction technology BIM and digital project management within architecture engineering and construction management programs It is also an invaluable reference for contractors developers architects engineers technology managers and other professionals in the AEC industry

Public Roads ,2003 Creating Capacity and Capability: Embracing Advanced Technologies and Innovations for Sustainable Future in Building Education and Practice Mostafa Babaeian Jelodar,Ruggiero Lovreglio,Zhenan Feng,Daniel Paes,Vishal Kumar,Chandana Siriwardana,2025-08-02 This three volume book is the proceeding of the 46th Australasian Universities Building Education Association AUBEA 2023 Conference which brings together papers on construction and built environment education and practice This particular conference theme Creating Capacity and Capability Embracing Advanced Technologies and Innovations for Sustainable Future in Building Education and Practice is closely related to a flagship national research programme funded by the Government of New Zealand known as the CanConstructNZ research programme aiming to balance the capacity and capability in the construction industry and the national pipeline of construction projects The capacity and capability of our construction industry in fulfilling the construction needs of the whole nation are reflected in the national pipeline of construction projects and have long been recognised as one of the main challenges facing the construction sector The practices and education of building and construction play an important role in determining the capacity and capability of the construction industry Within the context of achieving sustainable future and embracing advanced technologies to create capacity and capability in the construction sector various concepts research and innovative development have emerged and taken place This particular conference

theme has facilitated more in depth discourses and discussions on the latest ideas and innovation within the building and construction education and practice not only from the Australasian region but also from the wider international community including the USA the UK Brazil South Africa Nigeria China and Sri Lanka The contents of this book will be of interest to academic researchers industry professionals and policy makers alike

Lean Construction 4.0 Vicente A. González, Farook Hamzeh, Luis Fernando Alarcón, 2022-12-30 This book introduces and develops the novel concept of Lean Construction 4.0 The capability of Lean Construction to effectively adapt the architecture engineering construction AEC industry to this new era of digital transformation requires a reconceptualization of the triad people processes technology as a foundation for the theoretical and practical framework of Lean Construction Therefore a shift towards Lean Construction 4.0 is required Lean Construction 4.0 is a new systems wide thinking approach where synergies and overlaps between Lean Construction and digital smart technologies go far beyond BIM to reshape the way we design manage and operate capital projects in the modern age of automation This pioneering new book brings together the views of world experts at the interface of Lean Construction and digital smart technologies in order to channel research efforts to introduce and discuss current research and practice challenges and drivers and future perspectives of Lean Construction 4.0 It is not the aim of the book to keep adding digits to the term Lean Construction to catch up with the industry revolutions as they go on Instead after reading this book it will be undeniable for readers that the triad process people technology as proposed by Lean Construction 4.0 is required to achieve an effective long lasting digital transformation of the AEC industry Thus the aim of Lean Construction 4.0 is better explained by what it evokes a future vision of construction systems comprising people processes and technology using Industry 4.0 5.0 as a basis for technological innovation in the AEC industry coupled with Lean Construction theory and practice as a jettison for improved processes and systems integration The Lean Construction 4.0 concept coined and developed in this edited book is unique and the chapters provide practitioners and academics with a provocative reflection on the theoretical and practical aspects that shape the Lean Construction 4.0 concept More importantly Lean Construction 4.0 proposes a rationale for the AEC industry not only to survive but to thrive

Integrating Project Delivery Martin Fischer, Howard W. Ashcraft, Dean Reed, Atul Khanzode, 2017-02-23 A revolutionary collaborative approach to design and construction project delivery Integrating Project Delivery is the first book length discussion of IPD the emergent project delivery method that draws on each stakeholder's unique knowledge to address problems before they occur Written by authors with over a decade of research and practical experience this book provides a primer on IPD for architects designers and students interested in this revolutionary approach to design and construction With a focus on IPD in everyday operation coverage includes a detailed explanation and analysis of IPD guidelines and case studies that show how real companies are applying these guidelines on real world projects End of chapter questions help readers quickly review what they've learned and the online forum allows them to share their insights and ideas with others who either have or are in the process of

implementing IPD themselves Integrating Project Delivery brings together the owners architect engineers and contractors early in the development stage to ensure that problems are caught early and to address them in a collaborative way This book describes the parameters of this new more efficient approach with expert insight on real world implementation Compare traditional procurement with IPD Understand IPD guidelines and how they re implemented Examine case studies that illustrate everyday applications Communicate with other IPD adherents in the online forum The IPD approach revolutionizes not only the workflow but the relationships between the stakeholders the atmosphere turns collaborative and the team works together toward a shared goal instead of viewing one another as obstructions to progress Integrated Project Delivery provides a deep exploration of this approach with practical guidance and expert insight Computer Support for Successful Project Management Ulhaus M. Samant,2016-08-10 In the recent past computer programs have been used extensively to manage construction projects It has become almost mandatory for construction managers and civil engineering students to learn how to use computer software to manage projects using computer software Computer Support for Successful Project Management Using MS Project 2016 with Construction Projects is a book intended to help construction management professionals and civil engineering students in using popular software MS Project Although there are many books on MS Project there are very few that cover the subject from the construction managers perspective This book uses guided examples from the construction sector Most of the relevant project management terminology concepts and key processes have also been discussed based on the standards of the Project Management Institute This book will help construction project managers to easily relate with the projects they execute in their day to day life The author has included advanced topics like earned value analysis and multiple project management Readers will also learn how a tool like MS Project can be used for processes related to risk and quality in addition to meeting project objectives like scope time and cost This book will help readers transform from a construction professional to a construction project manager Data and the Built Environment Ian Gordon,Neil Thompson,2024-03-12 This book takes a data first approach to framing the built environment sector s unique challenges and how industry can address them through better use of data It describes how the sector has failed to derive value from data and the common causes underlying this failure It then provides practical guidance on how to use data to construct and operate built environment assets in a manner that better meets society s needs The book examines how industry norms organizational culture and our personal behaviours contribute to the successful use of data It sets out a philosophy and vision for the use of data in the built environment and how this in turn might help the sector realise better outcomes in terms of cost schedule quality and sustainability Data is a valuable asset one that the built environment sector must generate protect manage and exploit The book works as a holistic primer to data and the built environment written both for those who are new to data or the built environment and including deep dive material that will provide insight to experienced professionals *PMP Certification* George G.
