The Big Book ,2007      **British Journal of Photography** ,2007      The Changing Face of Retailing in the Asia Pacific  
Elizabeth Howard,2013-10-18 Retailing in the countries of Asia Pacific is changing dramatically Changes which took decades  
even centuries elsewhere are happening in a few years The growth of larger firms and the arrival of international retailers  
are changing the business landscape bringing the consistent supply and presentation of wider ranges of goods to consumers  
and leading to the development of new kinds of retail stores and modern shopping malls often in new locations All of these  
developments are important for economic growth and for consumers and their lifestyles They raise questions for  
governments about foreign investment about social and environmental change and about the fate of traditional retailers This  
book examines the trends seeking to understand how far they are global and how local circumstances affect developments  
International retailers have spread across the region but not always successfully Studies in several countries look at their  
processes of growth and some of the reasons for success and failure A review of changing regulation across the region  
suggests regulators should be concerned to avoid the problems of overconcentration of retail power and country studies  
reflect on the effects of regulation as well as cultural and other influences on change This book was published as a special
