Lens Diaphragm Opening

To set the lens opening, turn the diaphragm ring (Fig. 9) so that the desired aperture is opposite the dot on the milled ring of the lens barrel.

Lens aperture markings on Nikkor Lenses are arranged so that each stop doubles the speed of the one preceding it. Shutter speeds on the Nikon Camera are also arranged in the same manner.

The following table may be of some assistance in understanding the ratio between lens apertures and shutter speeds: —

Lens opening (Scale marking)	1.4	2	2.8	4	5.6	8	11	16
Exposure time (Ratio)	1	1	1	1	1	1	1	1
	1000	500	250	125	60	30	15	8

In other words, a 1.4 lens opening at 1/1000 th of a second shutter speed will give the same exposure on the film as a f/2 lens with a 1/500 th of a second speed, and so on down the rest of the table.

Focusing

Look through the eyepiece of the combined range finder and view finder of the Nikon Camera. In the center, you will observe a lighter colored rectangle. This is the range finder portion of the view finder. Out-of-focus objects will be seen in the range finder section as a double image. When the two images merge together (Fig. 11 and 12) the object is in exact focus.

Press the infinity lock (Fig. 10) and rotate the focusing wheel slightly, to release the automatic infinity lock. Continue to rotate the focusing wheel until double image merges into one. It is usually quite helpful, when holding the camera horizontally, to focus your attention on any vertical lines found in the object to be photographed. And in the same manner, when holding the camera vertically, focus your attention on horizontal lines.

After focusing, the exact distance of the object to be photographed may be found by reading the figure on the distance scale located against the black index dot.

Ian Adams is perhaps the best known landscape photographer in Ohio, and in the first volume of *A Photographer's Guide to Ohio*, he shared his knowledge of what to photograph in the Buckeye State and how to photograph it. Now in this second volume, Adams expands on his previous work, adding over 120 natural features, scenic rivers and byways, zoos and public gardens, historic buildings and murals, and even winter lighting displays to the list of places to visit and photograph in Ohio. In addition to advice on photographing landscapes, he offers tips for capturing excellent images of butterflies and dragonflies. Recognizing the rapid development of new technologies, Adams includes pointers on smartphone photography, lighting, and composition, digital workflow, and sharing images across a variety of platforms.
