H. Kühl, Roland W. A. Kühl, Robert Moreton, 2013-12-01 Preface In recent years Standard Software has

evolved from a tool for supporting commercial administrative activities e.g financial accounting to integrated systems that cover entire business processes in companies. The rapid development of these systems and an increasing number of implementations and the suppliers' announcements concerning the functional extension of their systems lead us to expect a further market penetration of Standard Software SAP's Industrial Solutions for instance which are offered for the key processes of entire lines of business demonstrate the impressive success of Standard Software Systems. The widespread implementation of commercial Standard Software has required considerable investments by industrial and service companies. Now it is time to verify if the planned gains and advantages of these systems have actually been realised i.e. one has to ask whether the systems' payoff as originally expected. It has to be kept in mind that the vendors have promised far-reaching optimisation of their clients' business processes by means of the so-called best practice reference processes implied by their systems. The advantages of these best practices should have been incorporated in the processes of the respective companies. On closer inspection one can see that the claimed advantages of the systems' capabilities in terms of optimised processes have not been realised in many of the current implementations. Studies and interviews undertaken with applying companies as part of the research for this book confirm this finding.

The Community College and the Good Society Chad Hanson, 2017-09-08. The community college is the largest single sector of the U.S. higher education network. As of 2005, 40 percent of newly enrolled undergraduate students attended community colleges. The American two-year school is a vast, rapidly changing and understudied institution. The aim of *The Community College and the Good Society* is to critically analyze the internal changes and external forces that shifted the focus of the two-year college from the liberal arts to job training. Chad Hanson raises a series of questions about what is lost or forsaken when public institutions become preoccupied with economic goals. When educational institutions turn their attention toward training workers to private sector specifications, Hanson argues, our social and cultural lives suffer. He describes the learning college movement, an ideological framework that justifies the current emphasis on vocational training. In addition, he explores the implications of competency-based education, a philosophy and method for creating curriculum with strong support among administrators and boards of trustees. For more than four decades, a steady stream of commentary aimed at understanding the two-year school made its way into the literature on higher education. In this work, Hanson provides an alternative view of the community college. He offers suggestions for new teaching strategies, curriculum, and organizational structure. These changes will encourage the potential for the two-year college to flourish as an institution that provides a permanent place for the arts and sciences.
