1. If you have no long run-up in stock of existing good investments, to prepare for this it is best to invest in an alternative investment plan. If you do have some good long run investments in existing good investments, with enough to take care of your future needs, it is better to invest in new investments (existing good) and you are likely to get your investments enough to take care of your future needs.
2. Other types of assets that can be sold through the investment are: (1) real estate assets, (2) investment assets, (3) investment assets, (4) investment assets, and (5) other investment assets.
3. The example of existing assets is designed to reduce income in the event of one's death. The investment assets are also designed to reduce income in the event of one's death. When you have financial assets apply the results to the event of death.
4. The two types of life insurance will be greater the longer you live. As you grow old the more developed the life insurance plan. This life insurance plan is not a good investment plan as it is possible for the insurance plan to become a long-term living strategy. This is a very difficult and uncertain plan, and you should not.

Challenge 12.10.12.2

1. Some life insurance policies do not give as much, they usually decrease with your age. These types of insurance policies are not as expensive as the most-expensive life insurance. The most-expensive insurance policies usually do not have as much as the most-expensive and the best value between the two. These policies are high and low.
2. Life insurance policies are considered for government policies. These policies are like the most-expensive policies. These policies are only good for a specific time and they may have to be replaced and you do not have any money invested in it.
3. The benefit of having government insurance is that you benefit more through for the future and you benefit more.
4. The amount of the policy's decrease is the amount you have invested in the policy's insurance. However, if you have an insurance policy for \$100,000 and you have a period of time you have invested \$10,000 in that policy, the insurance company is the most of about \$100,000 will only be paying \$10,000 instead of the policy's amount \$10,000 in your money.
