- 1.1 The graphs below show the relationship between the net force and the acceleration for two masses X and Y.

Which one of the following statements is true?

- A. Mass of X is greater than mass of Y.  
B. Mass of X is less than mass of Y.  
C. Mass of X is equal to mass of Y.  
D. The mass of X cannot be determined from the graph.
- 1.2 In which of the following cases would the resultant force acting on an object be equal to 0N?
- A. A car moving with constant acceleration.  
B. A ball falling from the sky to the ground with constant acceleration.  
C. A person standing on the ground with a rope attached to his waist.  
D. A person standing on the ground with a rope attached to his waist and a weight hanging from it.
- 1.3 Which of the statements below best describes Weightlessness?
- A. An object is not experiencing any forces.  
B. An object is not experiencing any forces, but is accelerating towards the ground.  
C. An object is not experiencing any forces, but is accelerating away from the ground.  
D. An object is not experiencing any forces, but is accelerating away from the ground.
- 1.4 The inertia of an object...
- A. is a measure of its mass.  
B. is a measure of its speed.  
C. is a measure of its acceleration.  
D. is a measure of its velocity.
- 1.5 An astronaut has a weight  $F_g$  on Earth. What distance, in terms of the radius of the Earth ( $r$ ), will the astronaut be if his weight is a 1/4 of his weight ( $F_g$ ) on the

surface of the Earth?

- A.  $r$   
B.  $2r$   
C.  $1.5r$   
D.  $0.5r$
- 1.6 A box is pushed forward with a force of 100N but does not move. A possible reason for this is that:
- A. The box is too heavy.  
B. The box is too light.  
C. The box is too big.  
D. The box is too small.

### QUESTION 2

The grade 11 learners learn that there is more than one way to determine the resultant of two vectors. One way is the component method. They want to use this method to find the resultant of the forces acting on a bucket by the ropes from which the bucket is suspended. The bucket is stationary.

- 2.1 Draw the force diagram. (2)
- 2.2 The tension in rope P is 100N at an angle of  $30^\circ$  to the vertical and the tension in Q is 51,52N at  $45^\circ$  to the vertical.

Calculate the MAGNITUDE of the:

- 2.2.1 Resultant of the components of P and Q horizontally. (4)  
2.2.2 Resultant of the components of P and Q vertically. (4)  
2.2.3 Resultant of the horizontal components. (5)  
2.2.4 Resultant of the vertical components. (5)  
2.2.5 Resultant of the forces acting on the bucket. (5)
- 2.3 Calculate the mass of the bucket. (3)

Geoengineering our Climate? Jason J. Blackstock,Sean Low,2018-09-04 If the detrimental impacts of human induced climate change continue to mount technologies for geoengineering our climate i e deliberate modifying of the Earth s climate system at a large scale are likely to receive ever greater attention from countries and societies worldwide Geoengineering technologies could have profound ramifications for our societies and yet agreeing on an international governance framework in which even serious research into these planetary altering technologies can take place presents an immense international political challenge In this important book a diverse collection of internationally respected scientists philosophers legal scholars policymakers and civil society representatives examine and reflect upon the global geoengineering debate they have

helped shape Opening with essays examining the historic origins of contemporary geoengineering ideas the book goes on to explore varying perspectives from across the first decade of this global discourse since 2006 These essays methodically cover the practical and ethical dilemmas geoengineering poses the evolving geoengineering research agenda the challenges geoengineering technologies present to current international legal and political frameworks and differing perceptions of geoengineering from around the world The book concludes with a series of forward looking essays some drawing lessons from precedents for governing other global issues others proposing how geoengineering technologies might be governed if as they begin to emerge from the lab into the real world This book is an indispensable resource for scientists activists policymakers and political figures aiming to engage in the emerging debate about geoengineering our climate The World and the Word Dr. Herbert L. Haddad,2019-07-10 This book offers fresh insight into women s mastery of technologies commonly associated with men with important implications for institutional efforts to identify and support technical proficiency among girls and women The work is structured across five original case studies featuring breast cancer survivors in Newfoundland who constructed a wooden dragon boat using hand and power tools Egyptian women who used information and communication technologies for political action during the Revolution of 2011 pioneer female audio engineers in the United States working in live concert and studio venues U S female commercial airline pilots who mastered the complexity of flying large aircraft and a university educated woman working in sewer maintenance and repair for the City of Detroit in the 1970s The case studies capture women s own voices and present a range of historical and geographic

locations A major contribution of this volume is the multidisciplinary analytical framework used to explain women's motivation to engage with non traditional technologies the role of peer and political support in encouraging persistence and informal as well as formal knowledge and skill acquisition Above all it is a story of women's empowerment individually and collectively This is a unique book suitable for undergraduates and graduates in the fields of Women's and Gender Studies Science Technology and Society STS Studies Engineering Education and Adult Education

**Reasoning in Measurement**  
 Nicola Mößner, Alfred Nordmann, 2017-03-16 This collection offers a new understanding of the epistemology of measurement The interdisciplinary volume explores how measurements are produced for example in astronomy and seismology in studies of human sexuality and ecology in brain imaging and intelligence testing It considers photography as a measurement technology and Henry David Thoreau's poetic measures as closing the gap between mind and world By focusing on measurements as the hard won results of conceptual as well as technical operations the authors of the book no longer presuppose that measurement is always and exclusively a means of representing some feature of a target object or entity Measurement also provides knowledge about the degree to which things have been standardized or harmonized it is an indicator of how closely human practices are attuned to each other and the world

Economics & Management 1/2025  
 AA.VV., 2025-03-31T15:55:00+02:00 To succeed in business it's no longer enough to innovate and offer new products it's essential to earn the trust of customers because trust is what keeps them loyal over time To achieve this companies must move beyond old business models and adopt a more ethical and responsible approach that not only strengthens customer relationships but also contributes to the wellbeing of society

*The Physics of the Mind* Phil Mollon, 2025-10-09 The Physics of the Mind New Perspectives for Psychotherapists Healers and Seekers is aimed at psychotherapists psychoanalysts healers and anyone interested in the interface of physics and the mind Both are interesting topics even more so when combined Phil Mollon's expertise is within psychology and over his long career he came to realise the importance of physics to the field In particular the branches that place mind and consciousness in the foreground of how we might understand the universe and our place within it There is a deep organising principle operating at all levels of the universe It gives rise to life and is apparent within the human mind in dreams and creativity A key lesson from quantum physics is that consciousness and the human mind are inextricably involved in the emergence of what we can observe and experience of our matter based realm In other words the behaviour of the quantum realm is shaped by our observation of it Just as we think of space time as shaped by gravitational forces and massive bodies so we can conceptualise mind space The latter contains mathematical correlithms of thought emotion and memory whereby what is similar attracts more of the same in a manner analogous to gravity These have effects within the mind and in the wider life field For example severe and repeated childhood trauma creates the equivalent of black holes in the mind space Metaphysics posits that our matter based universe is subtended within an infinite unified field of intelligence and creativity We are contained within a vast mind The principle is that unlimited guidance and

knowledge is available via meditation and intuition requiring only that we seek It is never thrust upon us This is a book filled with extraordinary ideas to dip into wherever curiosity and intuition lead It is the author s fervent wish that what is within will stimulate thought and awareness and spark continuing creative concepts concerning our place in this cosmos
