Outsider Scientists Oren Harman,Michael R. Dietrich,2013-12-11 Outsider Scientists

describes the transformative role played by outsiders in the growth of the modern life sciences Biology which occupies a special place between the exact and human sciences has historically attracted many thinkers whose primary training was in other fields mathematics physics chemistry linguistics philosophy history anthropology engineering and even literature These outsiders brought with them ideas and tools that were foreign to biology but which when applied to biological problems helped to bring about dramatic and often surprising breakthroughs This volume brings together eighteen thought provoking biographical essays of some of the most remarkable outsiders of the modern era each written by an authority in the respective field From Noam Chomsky using linguistics to answer questions about brain architecture to Erwin Schrödinger contemplating DNA as a physicist would to Drew Endy tinkering with Biobricks to create new forms of synthetic life the outsiders featured here make clear just how much there is to gain from disrespecting conventional boundaries Innovation it turns out often relies on importing new ideas from other fields Without its outsiders modern biology would hardly be recognizable

Nathan, 2013-05-03 Since the publication of the first edition 1994 there have been rapid developments in the application of hydrology geomorphology and ecology to stream management In particular growth has occurred in the areas of stream rehabilitation and the evaluation of environmental flow needs The

concept of stream health has been adopted as a way of assessing stream resources and setting management goals Stream Hydrology An Introduction for Ecologists Second Edition documents recent research and practice in these areas Chapters provide information on sampling field techniques stream analysis the hydrodynamics of moving water channel form sediment transport and commonly used statistical methods such as flow duration and flood frequency analysis Methods are presented from engineering hydrology fluvial geomorphology and hydraulics with examples of their biological implications This book demonstrates how these fields are linked and utilised in modern scientific river management Emphasis on applications from collecting and analysing field measurements to using data and tools in stream management Updated to include new sections on environmental flows rehabilitation measuring stream health and stream classification Critical reviews of the successes and failures of implementation Revised and updated windows based AQUAPAK software This book is essential reading for 2nd 3rd year undergraduates and postgraduates of hydrology stream ecology and fisheries science in Departments of Physical Geography Biology Environmental Science Landscape Ecology Environmental Engineering and Limnology It would be valuable reading for professionals working in stream ecology fisheries science and habitat management environmental consultants and engineers

**Curvature: A Variational Approach** A. Agrachev, D. Barilari, L. Rizzi, 2019-01-08 The curvature discussed in this paper is a far reaching generalization of the Riemannian sectional curvature The authors give a unified definition of curvature which applies to a wide class of geometric structures whose geodesics arise from optimal control problems including Riemannian sub Riemannian Finsler and sub Finsler spaces Special attention is paid to the sub Riemannian or Carnot Carath odory metric spaces The authors construction of curvature is direct and naive and similar to the original approach of Riemann In particular they extract geometric invariants from the asymptotics of the cost of optimal control problems Surprisingly it works in a very general setting and in particular for all sub Riemannian spaces

**Professional Journal of the United States Army** ,2015 Coercive Care Bernadette Mcsherry, Ian Freckelton, 2013-06-26 There has been much debate about mental health law reform and mental capacity legislation in recent years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue This edited volume explores the concept of coercive care in relation to individuals such as those with severe mental illnesses those with intellectual and cognitive disabilities and those with substance use problems With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment The contributors to the book look at mental health capacity and vulnerable adult s care as well as the law related to those areas The book is split into four parts which cover human rights and coercive care legal capacity and coercive care the legal coordination of coercive care and coercive care and individuals with cognitive impairments The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition
