Collected Papers in Physics and Engineering James Thomson,James C. Thomson,1912 *Frames of Meaning* HM

Collins,TJ Pinch,2013-04-15 Originally published in 1982 Taking a radical interpretation of the Kuhnian concept of paradigm incommensurability the authors begin by discussing the difficulties of gaining access to the ideas of communities with different rational categories and then define the subject area of parapsychology offering a review of the relevant literature After exploring parapsychology s compatibility with science physics psychology and quantum theory the authors move on from this predominantly theoretical framework and devote the middle section to an empirical study of metal bending They conclude with an examination of the results analyse diverse interpretations and investigate the consequences for the idea of scientific revolution How Einstein Created Relativity out of Physics and Astronomy David Topper,2012-09-27 This book tracks the history of the theory of relativity through Einstein s life with in depth studies of its background as built upon by ideas from earlier scientists The focus points of Einstein s theory of relativity include its development throughout his life the origins of his ideas and his indebtedness to the earlier works of Galileo Newton Faraday Mach and others the application of the theory to the birth of modern cosmology and his quest for a unified field theory Treading a fine line between the popular and technical but not shying away from the occasional equation this book explains the entire range of relativity and weaves an up to date biography of Einstein throughout The result is an explanation of the world of relativity based on an extensive journey into earlier physics and a simultaneous voyage into the mind of Einstein written for the curious and intelligent reader

The Quantum Theory of Planck, Einstein, Bohr and Sommerfeld: Its Foundation and the Rise of Its Difficulties 1900-1925 Jagdish Mehra,Helmut Rechenberg,1982-09-13 Quantum Theory together with the principles of special and general relativity constitute a scientific revolution that has profoundly influenced the way in which we think about the universe and the fundamental forces that govern it The Historical Development of Quantum Theory is a definitive historical study of that scientific work and the human struggles that accompanied it from the beginning Drawing upon such materials as the resources of the Archives for the History of Quantum Physics the Niels Bohr Archives and the archives and scientific correspondence of the principal quantum physicists as well as Jagdish Mehra s personal discussions over many years with most of the architects of quantum theory the authors have written a rigorous scientific history of quantum theory in a deeply human context This multivolume work presents a rich account of an intellectual triumph a unique analysis of the creative scientific process The Historical Development of Quantum Theory is science history and biography all wrapped in the story of

a great human enterprise Its lessons will be an aid to those working in the sciences and humanities alike Catalogue of Scientific Papers (1800-1900): ser. 4 , 1884-1900 Royal Society (Great Britain),1914 **The Electrician** ,1923

Gardiner,Gerald Druce,H. W. Blood-Ryan,1888 *The Creationists* Ronald L. Numbers,1993-01-01 Forty seven percent of the American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years Ronald L Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement s tangled roots in the theologies of late nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers s story of today s widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth s antiquity to the insistence of present day scientific creationists that most fossils date back to Noah s flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science Miscellaneous Scientific Papers William John Macquorn Rankine,Peter Guthrie Tait,1881
