*Knowledge Production and Contradictory Functions in African Higher Education* Nico Cloete, Peter Maassen, 2015-03-01

The dominant global discourse in higher education now focuses on world class universities inevitably located predominantly in North America Europe and increasingly East Asia The rest of the world including Africa is left to play catch up But that discourse should focus rather on the tensions even contradictions between excellence and engagement with which all universities must grapple Here the African experience has much to offer the high participation and generously resourced systems of the so called developed world This book offers a critical review of that experience and so makes a major contribution to our understanding of higher education

**Emerging Technologies** Gary E. Marchant, Wendell Wallach, 2020-07-26 Emerging technologies present a challenging but fascinating set of ethical legal and regulatory issues The articles selected for this volume provide a broad overview of the most influential historical and current thinking in this area and show that existing frameworks are often inadequate to address new technologies such as biotechnology nanotechnology synthetic biology and robotics and innovative new models are needed This collection brings together invaluable innovative and often complementary approaches for overcoming the unique challenges of emerging technology ethics and governance

**Science Fictions** Stuart Ritchie, 2020-07-21 An insider's view of science reveals why many scientific results cannot be relied upon and how the system can be reformed Science is how we understand the world Yet failures in peer review and mistakes in statistics have rendered a shocking number of scientific studies useless or worse badly misleading Such errors have distorted our knowledge in fields as wide ranging as medicine physics nutrition education genetics economics and the search for extraterrestrial life As Science Fictions makes clear the current system of research funding and publication not only fails to safeguard us from blunders but actively encourages bad science with sometimes deadly consequences Stuart Ritchie's own work challenging an infamous psychology experiment helped spark what is now widely known as the replication crisis the realization that supposed scientific truths are often just plain wrong Now he reveals the very human biases misunderstandings and deceptions that undermine the scientific endeavor from contamination in science labs to the secret vaults of failed studies that nobody gets to see from outright cheating with fake data to the more common but still ruinous temptation to exaggerate mediocre results for a shot at scientific fame Yet Science Fictions is far from a counsel of despair Rather it's a defense of the scientific method against the pressures and perverse incentives that lead scientists to bend the rules By illustrating the many ways that scientists go wrong Ritchie gives us the knowledge we need to spot dubious research and points the way to reforms that could make science trustworthy once again

**Earthmasters** Clive Hamilton, 2013-02-15 DIV This book goes to the heart of the unfolding reality of the twenty first century international efforts to reduce greenhouse gas emissions have all failed and before the end of the century Earth is projected to be warmer than it has been for 15 million years The question can the crisis be avoided has been superseded by a more frightening one what can be done to prevent the devastation of the living world And the disturbing answer now under wide discussion both within and outside the scientific community is to seize control of the very climate of the Earth itself divDIV divDIV Clive Hamilton begins by exploring the range of technologies now being developed in the field of geoengineering the intentional enduring large scale manipulation of Earth's climate system He lays out the arguments for and against climate engineering and reveals the extent of vested interests linking researchers venture capitalists and corporations He then examines what it means for human beings to be making plans to control the planet's atmosphere probes the uneasiness we feel with the notion of exercising technological mastery over nature and challenges the

ways we think about ourselves and our place in the natural world
