## **Polokwane Campus Teaching:**

**Self-directed learning research and its impact on educational practice** Elsa Mentz,Roxanne Bailey,2021-05-17

This scholarly book is the third volume in an NWU book series on self directed learning and is devoted to self directed learning research and its impact on educational practice The importance of self directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised The target audience does not only consist of scholars in the field of self directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors The book contributes to the discourse on creating dispositions towards self directed learning among all learners and adds to the latest body of scholarship in terms of self directed learning Although from different perspectives all chapters in the book are closely linked together around self directed learning as a central theme following on the work done in Volume 1 of this series Self Directed Learning for the 21st Century Implications for Higher Education to form a rich knowledge bank of work on self directed learning     *Recalibrating teacher training in African higher education institutions* Sifiso Sibanda,Gideon

(Deon) P. van Tonder,Washington T. Dudu,2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark     **FET**

**Colleges** South Africa. Department of Education,2007     *Autism* Mary Clasquin-Johnson,Dikeledi Mahlo,Michel

Clasquin-Johnson,2023-02-10 This book is written at a time of a paradigm shift in the African continent where dependence on western epistemologies and ontologies are giving way to African indigenous knowledge systems Africa has been an importer of knowledge from the west since time immemorial and this book contributes to the body of knowledge on autism spectrum disorder ASD from the African perspective As a result decoloniality and Inclusive Education have gained traction within the academic discourse with University of South Africa UNISA hosting decoloniality annual conference and a summer school to stimulate academic discussions and debates with a focus on African indigenous knowledge systems and theoretical lenses as opposed to the western epistemologies The book also demystifies some of the misconceptions that children with ASD are a curse and punishment from God or gods Among others Ubuntu seems to be the dominant theoretical framework

underpinning some of the research studies reported in this book      *Cases on Transnational Learning and Technologically Enabled Environments* Mukerji, Siran, Tripathi, Purnendu, 2010-03-31 This book offers case studies on divergent themes addressing the core perspective of technological adaptability and transnational learning Provided by publisher      **Turfloop**

**a Conscious Pariah** Kanyane Chris Kanyane, Chris Kanyane, 2010 This book provides reflections on the butterfly effect on how Turfloop brought in the Age of Barack Obama What is the Age of Barack Obama To paraphrase Dr Ineke Van Kessel a prominent historian at the Leiden University in the Netherlands The University of the North also known as Turfloop played a vital role as the center of communication coordination ideological direction the engine of bringing the new South Africa was University of the North We approached this book like detectives Fortunately in our detective work we were not concerned with a particular agenda we were not trying to prove that a certain method of thinking was right or wrong We didn't want this book to be filled with personal opinions and biases We wanted this book to be juicy and accessible to every person who reads it in whatever corner of the world We have to back up our story with facts of course and get other people to do practical analysis and later we added our own perspectives When we completed writing this book we passed it around amongst critical people spread across the globe Most of them said that the book is somehow highbrow and at the same time all together lowbrow which came as a compliment A lot of people are somewhere in between We want this book to embody that because there are many people there we want them to appreciate this book      **Working with indigenous knowledge**

Fhumulani M. Mulaudzi, Rachel T. Lebesse, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeless and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research      Food Education and Food Technology in School Curricula Marion Rutland, Angela Turner, 2020-04-08 This book draws together the perceptions and experiences from a range of international professionals with specific reference to food education It presents a variety of teaching learning and curriculum design approaches

relating to food across primary secondary and vocational school education undergraduate initial teacher education programs and in service professional development support contexts Contributions from authors of a variety of background and countries offer insight into some of the diverse issues in food education internationally lessons to be learned from successes and failures including action points for the future The book will be both scholarly and useful to teachers in primary and secondary schools
