Technology in American Water Development Edward A. Ackerman,George O.G. Loff,2013-11-26 Technology in American Water Development is an exploratory study This book addresses the proven technology which has influenced water development in the past those still effective in shaping its course and the emerging technology of today The heart of this study is in the thirty one case descriptions selected from both the emerging and proven technology Each case description has been treated as briefly as is consistent with clarity and nontechnical language has been used wherever possible This title will help to introduce engineers and physical scientists to the administrative problems and opportunities which stem from their works Architectural Energetics in Archaeology Leah McCurdy,Elliot M. Abrams,2019-01-25 Archaeologists and the public at large have long been fascinated by monumental architecture built by past societies Whether considering the earthworks in the Ohio Valley or the grandest pyramids in Egypt and Mexico people have been curious as to how pre modern societies with limited technology were capable of constructing monuments of such outstanding scale and quality Architectural energetics is a methodology within archaeology that generates estimates of the amount of labor and time allocated to construct these past monuments This methodology allows for detailed analyses of architecture and especially the analysis of the social power underlying such projects Architectural Energetics in Archaeology assembles an international array of scholars who have analyzed architecture from archaeological and historic societies using architectural energetics It is the first such volume of its kind In addition to applying architectural energetics to a global range of architectural works it outlines in detail the estimates of costs that can be used in future architectural analyses This volume will serve archaeology and classics

researchers and lecturers teaching undergraduate and graduate courses related to social power and architecture It also will interest architects examining past construction and engineering projects **Federal Register** ,2013-09 **Sustainable Hydropower in West Africa** Amos T. Kabo-Bah,Chukwuemeka J. Diji,2018-01-02 Sustainable Hydropower in West Africa Planning Operation and Challenges provides a comprehensive overview of the planning deployment and management of hydropower in West Africa and similar regions The authors use a practical approach to analyze available technology modeling methodologies and sustainability aspects such as the dependence between climate and hydropower and socio economic and environmental impacts They discuss the need for innovative solutions and how to close research gaps in the field for this region Although more than 50% of West Africa s hydropower potential is still untapped re engineering and maintenance of existing hydropower plants is a key issue and is discussed Issues of productivity and optimization are also covered as well as the introduction of new technology and integration of hydropower into existing energy systems renewable energy systems in particular Policy and regulation are also examined considering competing needs when managing water resources The final chapter offers a summary of activities strategies policies and technology for easy reference and practical use Due to its wide coverage and real life examples this is a useful reference for engineering professionals in the field of hydropower working in West Africa and regions with similar conditions This book helps engineers make technology and location decisions for planning deploying and operating hydropower plants The book s accessible language and international authorship also allows for easy use by energy researchers analysts and policy makers who need information for the analysis modeling financing implementation and regulation of hydropower in West Africa and related regions Presents the most current issues related to hydropower deployment and management in West Africa and regions with similar conditions Discusses key challenges focusing on practical aspects and methodologies Explores the technological sustainability and economic aspects to be considered when deploying operating and maintaining hydropower plants in West Africa and similar regions
