The Importance of Emigration for the Solution of Population Problems in Western Europe Hilde Wander, 2013-11-11 This

first publication of the Research Group for European Migration Problems is devoted to the importance of migration in Western Europe. Small wonder that especially German social scientists living in a country invaded by millions and millions of refugees and expellees from Central and Eastern Europe are paying so much attention to the solution of regional and national overpopulation. It is doubtful whether we can speak of European overpopulation in general. Dr Hilde Wander's investigations make it clear that from a European point of view short distance migration may solve many problems for which up to now overseas emigration to Canada, Australia etc seemed to be the only remedy. Those talking about European integration there still is much more than real action should keep in mind that the only way out of the present system of frustrations consists in economic and social freedom i.e. a free flow of goods, capital and migrating people. The Research Group for European Migration Problems is an international committee promoting the study of one of the crucial social problems rather neglected so far: a more effective distribution and spreading of the European population.
