Quizlet Economics Chapter 1:

The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within

Les réalités de la 'réalité' - deuxième partie: Vers une compréhension des facteurs responsables des progrès de la science moderne (Volume 2) Fritz Dufour, MBA' DÉSS, 2019-03-23 La différence entre la première partie et la deuxième partie volumes 1 et 2 de cette série est que dans la première partie l'auteur a montré comment ce que nous appelons la réalité commence avec le moi intérieur alors que la deuxième partie décrit ce qui en réalité affecte et modifie l'environnement ou la réalité et quels sont les facteurs derrière cette dynamique Ce qui impacte et modifie l'environnement c'est la science Ce volume 2 commence par montrer comment la technologie joue un rôle important dans les progrès scientifiques Bien que la relation entre les deux soit symbiotique la science peut exister sans technologie mais la technologie a évidemment besoin de la science La technologie militaire est un exemple de la manière dont la technologie peut faire progresser la science Certaines inventions militaires finissent par avoir un usage civil La science tant au centre de la société le livre plaide en faveur de l'impact direct de sciences sociales telles que la politique et l'économie sur les progrès de la science La politique dit l'auteur influence la science en raison de l'incertitude de la science et l'économie le fait grâce à la disponibilité de fonds pour les chercheurs et les scientifiques D'autre part le gouvernement influence également les progrès scientifiques par le biais de réglementations Le livre donne comme exemple la régulation du cyberespace En outre en montrant comment l'art influence la science l'auteur plaide en faveur de l'aspect polyfactoriel du progrès scientifique Dans cette optique il prouve également que des facteurs tels que le scepticisme la curiosité et la quête du savoir influencent grandement le
