**Negotiating Trade** John S. Odell, 2006-02-16 Negotiations between governments shape the world political economy and in turn the lives of people everywhere Developing countries have become far more influential in talks in the World Trade Organization including infamous stalemates in Seattle in 1999 and Cancun in 2003 as well as bilateral and regional talks like those that created NAFTA Yet social science does not understand well enough the process of negotiation and least of all the roles of developing countries in these situations This 2006 book sheds light on three aspects of this otherwise opaque process the strategies developing countries use coalition formation and how they learn and influence other participants beliefs This book will be valuable for many readers interested in negotiation international political economy trade development global governance or international law Developing country negotiators and those who train them will find practical insights on how to avoid pitfalls and negotiate better

*Negotiated Risks* Rudolf Avenhaus, Gunnar Sjöstedt, 2009-04-28 The International Institute for Applied Systems Analysis IIASA has had risk as a research topic on its agenda right from its inception in 1972 Risk has played a role in the Energy Program with research being carried out both in house and in cooperation with other international institutions like the International Atomic Energy Agency IAEA and national research centers Research areas were primarily the evaluation of all possible risks within one category of energy supply like nuclear fission or fusion or fossil fuels and even more important the comparison of risks of different energy supply strategies Later on an independent program was started which still exists today under the name Risk and Vulnerability There is a large amount of literature on risks to which IIASA's research programs have contributed significantly over the years and there is of course an abundance of published work on international negotiations part of which is a result of the work of the Processes of International Negotiation PIN Program There are however so far no studies on the combination of these two strands Therefore and as research on both topics is housed at IIASA we are happy that our PIN Program has undertaken the difficult and important task of analyzing what the editors of this book have called negotiated risks
