Hidden Innovation Stuart Cunningham, 2013 Because of the divergence in world views and methods between scientists and the creative sector innovation systems and policies have focused for decades on science engineering technology and medicine The humanities arts and social sciences have had their contributions hidden from research agendas policy and program initiatives and the public mind But structural changes to advanced economies and societies have brought service industries and the creative sector to greater prominence as key contributors to innovation Hidden Innovation peels back the veil tracing the way innovation occurs through new forms of screen production enabled by social media platforms as well as in public broadcasting It shows that creative workers are contributing fresh ideas across the economy and traces how policies are beginning to catch up with the changing social and economic realities on a global level Hidden Innovations argues that the innovation framework offers the best opportunity in decades to reassess the case for the public role of the humanities particularly the media and cultural and communication studies

Transforming Public Services by Design Sabine Junginger, 2016-12-01 For policy makers and policy implementers design challenges abound Every design challenge presents an opportunity for change and transformation To get from policy intent to policy outcome however is not a straightforward journey It involves people and

services as much as it involves policies and organizations Of all organizations perhaps government agencies are perceived to be the least likely to change They are embedded in enormous bureaucratic structures that have grown over decades if not centuries In effect many people have given up hope that such an institution can ever change its ways of doing business And yet from a human centered design perspective they present a fabulous challenge Designed by people for people they have a mandate to be citizen centered but they often fall short of this goal If human centered design can make a difference in this organizational context it is likely to have an equal or greater impact on an organization that shows more flexibility for example one that is smaller in size and less entangled in legal or political frameworks Transforming Public Services by Design offers a human centered design perspective on policies organizations and services Three design projects by large scale government agencies illustrate the implications for organizations and the people involved in designing public services the Tax Forms Simplification Project by the Internal Revenue Service 1978 1983 the Domestic Mail Manual Transformation Project by the United States Postal Service 2001 2005 and the Integrated Tax Design Project by the Australian Tax Office These case studies offer a unique demonstration of the role of human centered design in policy context This book aims to support designers and managers of all backgrounds who want to know more about reorienting policies organizations and services around people
