Aerni-Flessner, Charles Fogelman, Nthabiseng Mokoena-Mokhali, 2023-11-30 Lesotho's history has long been defined by its enclave status within South Africa but it is a hard fought and hard won status that helps unite Basotho through the shared history of struggle against colonial rule in the region Since the end of apartheid in 1994 Lesotho's status as a separate entity has been called into question though the fierce national pride built through centuries of resistance to outside rule has mitigated against any serious discussions of incorporating Lesotho into South Africa Still the political instability and lack of a flourishing domestic economy have made life difficult for the majority of Basotho and could call into question the viability and legitimacy of the state in the eyes of its citizens if it cannot enact significant reforms in the coming decades Historical Dictionary of Lesotho Third Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 500 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Lesotho **The United Nations Global Compact and the Encyclical Laudato Si** Oliver F.

This Radical Land Daegan Miller, 2018-03-22 The American people sees itself advance across the wilderness draining swamps straightening rivers peopling the solitude and subduing nature wrote Alexis de Tocqueville in 1835 That's largely how we still think of nineteenth century America today a country expanding unstoppably bending the continent's natural bounty to the national will heedless of consequence A country of slavery and of Indian wars There's much truth in that vision But if you know where to look you can uncover a different history one of vibrant resistance one that's been mostly forgotten This *Radical Land* recovers that story Daegan Miller is our guide on a beautifully written revelatory trip across the continent during which we encounter radical thinkers settlers and artists who grounded their ideas of freedom justice and progress in the very landscapes around them even as the runaway engine of capitalism sought to steamroll everything in its path Here we meet Thoreau the expert surveyor drawing anticapitalist property maps We visit a black antislavery community in the Adirondack wilderness of upstate New York We discover how seemingly commercial photographs of the transcontinental railroad secretly sent subversive messages and how a band of utopian anarchists among California's sequoias imagined a greener freer future At every turn everyday radicals looked to landscape for the language of their dissent drawing crucial early links between the environment and social justice links we're still struggling to strengthen today Working in a tradition that stretches from Thoreau to Rebecca Solnit Miller offers nothing less than a new way of seeing the American past and of understanding what it can offer us for the present and the future

Making Medicines Affordable National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Ensuring Patient Access to Affordable Drug Therapies, 2018-03-01 Thanks to remarkable advances in modern health care attributable to science engineering and medicine it is now possible to cure or manage illnesses that were long deemed untreatable At the same time however the United States is facing the vexing challenge of a seemingly uncontrolled rise in the cost of health care

Total medical expenditures are rapidly approaching 20 percent of the gross domestic product and are crowding out other priorities of national importance. The use of increasingly expensive prescription drugs is a significant part of this problem, making the cost of biopharmaceuticals a serious national concern with broad political implications. Especially with the highly visible and very large price increases for prescription drugs that have occurred in recent years, finding a way to make prescription medicines and health care at large more affordable for everyone has become a socioeconomic imperative. Affordability is a complex function of factors including not just the prices of the drugs themselves but also the details of an individual's insurance coverage and the number of medical conditions that an individual or family confronts. Therefore, any solution to the affordability issue will require considering all of these factors together. The current high and increasing costs of prescription drugs coupled with the broader trends in overall health care costs is unsustainable to society as a whole. Making Medicines Affordable examines patient access to affordable and effective therapies with emphasis on drug pricing, inflation in the cost of drugs and insurance design. This report explores structural and policy factors influencing drug pricing, drug access programs, the emerging role of comparative effectiveness assessments in payment policies, changing finances of medical practice with regard to drug costs and reimbursement, and measures to prevent drug shortages and foster continued innovation in drug development. It makes recommendations for policy actions that could address drug price trends, improve patient access to affordable and effective treatments, and encourage innovations that address significant needs in health care.
